TOMAHAWK LIVE TRAP • HAZELHURST, WISCONSIN**

Tomahawk llc.
L I V E ■ T R A P

The Tomahawk Live Trap team is committed to providing you with the finest animal traps, cages, and animal handling equipment available. Our mission is to exceed our customer's expectations by providing them with the highest quality humane animal control products available. We deliver our products as timely as possible, usually shipping within one business day.

Many of you have approached us with great ideas about new and improved products. We often build custom traps, cages and other animal handling products for our customers. Thank you for these opportunities and the trust you have in us. We genuinely enjoy working with you our valued customers to develop new products and improve existing ones.

We proudly manufacture our products in the USA at our 40,000 square foot facility in Northern Wisconsin. Our team takes pride in the quality of their work and we back all of our products with a one-year warranty against factory defects.

My wife Jenny and I attend many trade conferences each year all around our great country and we genuinely enjoyed visiting with each of you. If you should see us at one of these conferences in the future, please stop by and say hello or give us a call at 800-272-8727 to share your thoughts. We can also be reached via email at greg@livetraps.com or jenny@livetraps.com. The team at Tomahawk Live Trap greatly appreciates you, our valued customers, for your continued support.

WE SINCERELY WANT TO SAY

Thank You

*Greg Smith and
Jenny Smith*

The Tomahawk Original Series Traps

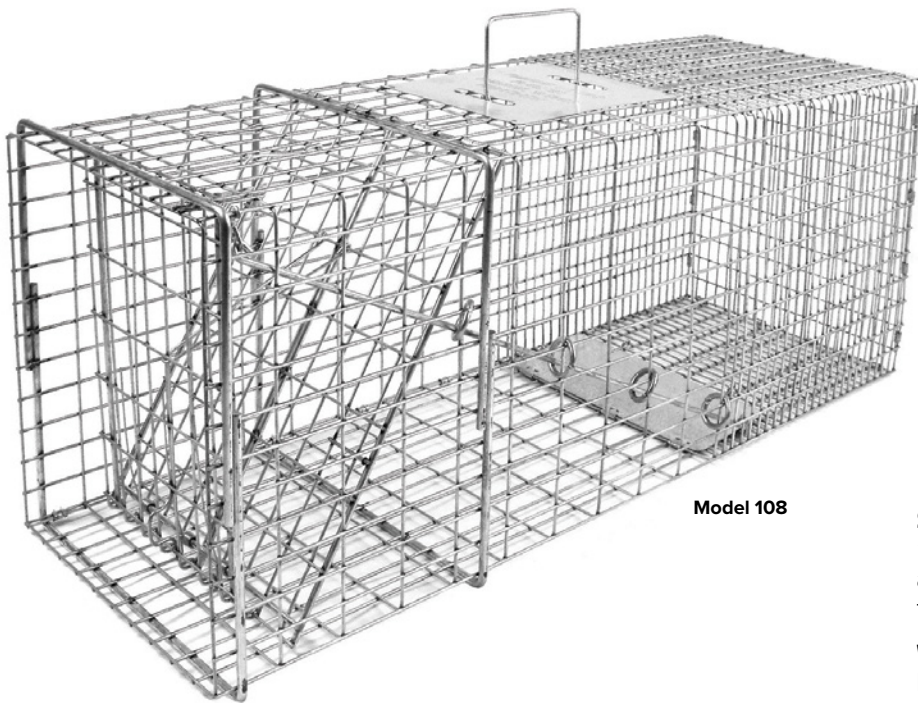

Tomahawk Original Series traps are the strongest, most reliable, and most durable traps available. These traps are constructed with galvanized wire mesh frames, and have steel reinforcing rods welded to the frame for added strength.

The entire trap is galvanized to provide maximum protection against rust and corrosion. Our traps are made in the USA at our facility in Wisconsin. Backed with a one-year factory warranty, each trap is quality inspected and tested before it is shipped to you, our valued customer.

PRODUCT HIGHLIGHTS

- Spring loaded trap doors quickly snap into place preventing animals from backing out when the trap is sprung
- Locking trap doors prevent animals from escaping, even if the trap is turned over or flipped completely upside down
- Tighter wire mesh pattern around bait areas prevent animals from reaching into the trap and stealing bait from the outside
- Easy adjusting trigger system allows for light or heavy trap sets
- Brass roller and "wound-around" trigger assures nearly 100% capture rate with virtually no misfires
- Hand guards under trap handles on most models protect handlers against animal scratches
- A wide variety of trap sizes in several categories to choose from. Catch small rodents on up to large dogs

PRO
MADE IN THE USA

Model 108

the Tomahawk Original Series Traps Include:

- Spring loaded trap doors
- Locking trap doors
- Strategic mesh patterns
- Sure-fire trigger
- Adjustable trigger

Superior strength - Tomahawk Original Series Traps are the most reliable traps on the market. They are built with heavy duty materials and backed by a one year manufacturers warranty. Each trap is hand tested and inspected for quality.

Very affordable - These traps have a single trap door and do not have a back door. This means animals must be released through the same door from which they entered the trap. The single trap door design makes this category more affordable than most of our other trap categories.

Original series - Rigid Traps with One Trap Door

the Tomahawk Original Series Traps Include:

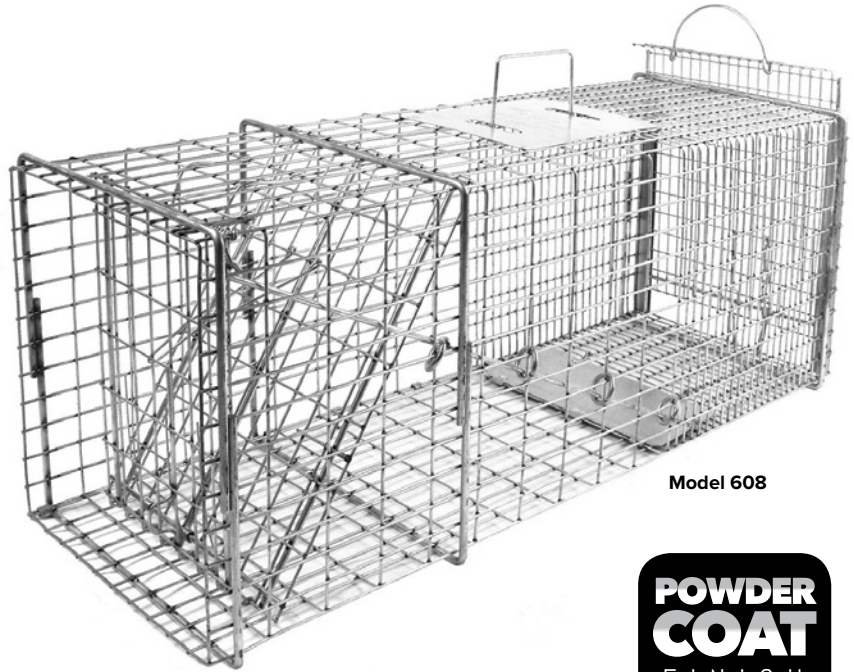

- Spring loaded trap doors
- Locking trap doors
- Strategic mesh patterns
- Sure-fire trigger
- Adjustable trigger

Easy animal release - Easy release door provides the safest and easiest way to release trapped animals.

Easy animal transfer - Easy release door allows captured animals to be safely and easily transferred to holding or transfer cages. We offer a line of transfer cages that match up perfectly with these traps. This allows you to keep your traps in the field by transferring animals from your traps into transfer cages.

Easy trap baiting - Baiting is much easier when done from the back of the trap with the easy release door removed. You no longer have to reach through the front of the trap and risk setting it off.

Simple to operate - Unsnap the latch which holds the easy release door in place, and remove it by lifting up on the attached handle.

Model 107

Calms wary animals - Trap doors at both ends allow animals to see through the trap without obstruction and enter with confidence.

Allows entry from either end - Trap doors at both ends allow animals to enter the trap from either end, increasing your chances of success.

SET AS SINGLE OR DOUBLE DOOR - Traps with two trap doors are more versatile because they can be set with only the front door as a baited trap or set both trap doors to use as a bait-less runway trap.

Original series - Rigid Traps with Two Trap Doors

Model	Suggested Target Animal Size	L - W - H	Construction	Wt	Price	6+

Positive set - Allows for the trap to be flush mounted against den openings when the door is open. This is called a "positive set" because the animal must enter the trap when exiting its den.

Versatile - Flush mount traps can also be used as traditional bait and scent sets as well as flush mount positive sets.

the **Tomahawk**
Original
Series Traps
Include:

- Spring loaded trap doors
- Locking trap doors
- Strategic mesh patterns
- Sure-fire trigger
- Adjustable trigger

Collapsible Traps

Minimal storage space required - Folds flat when not in use and take about 1/10th the storage space as rigid traps.

Simple to fold and unfold - Our Collapsible Traps fold flat for storage and set up for deployment in seconds with no tools required.

No assembly required - Collapsible traps come completely assembled.

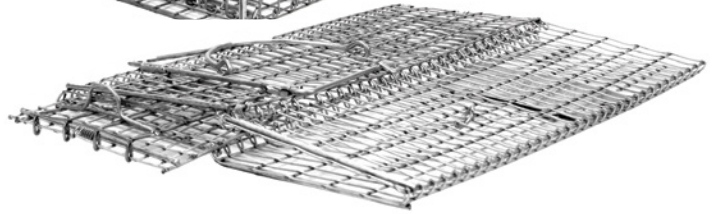

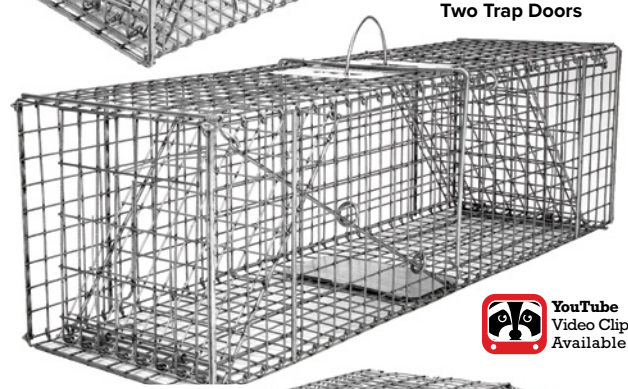

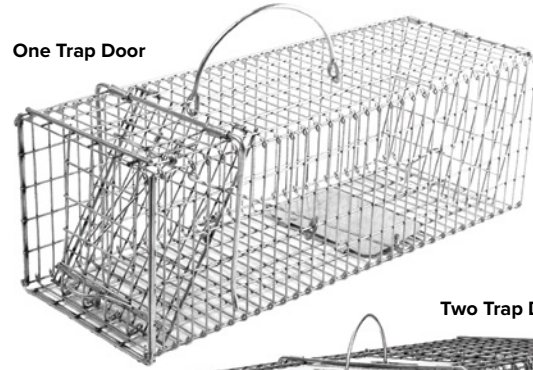

Two Trap Doors (All of the above features and more...)

Calms wary animals - Trap doors at both ends allow animals to see through the trap without obstruction and enter with confidence.

Allows entry from either end - Trap doors at both ends allow animals to enter the trap from either end, increasing your chances of success.

Two locking trap doors - When an animal sets off the trap by stepping on the trip pan, both spring loaded doors instantly snap shut and lock into place, making escape virtually impossible.

Set as Single Or Double Door - Traps with two trap doors are more versatile because they can be set with only the front door as a baited trap or set both trap doors to use as a baitless runway trap.

"The people that come through the doors here each day are not just my coworkers. They are like family. It's a family I'm proud to be a part of."

Matt
Quality Control Professional

The Tomahawk Professional Series Traps

Tomahawk Professional Series Live Traps are the strongest, most durable, and effective traps available. These traps surpass even our renowned "Original Series" traps when it comes to toughness and durability.

They feature a very strong frame, heavy duty components, more powerful trap door springs, "critter proof" trip pan protection system and tighter mesh throughout the trap.

Tighter mesh patterns prevent animals from reaching in from the outside to steal bait. It also prevents animals from reaching out and damaging property while trapped.

Critter Proof pan guards are installed on all 9 x 9 and larger trap models to prevent animal damage. This means no more wasted time flattening bent trip pans.

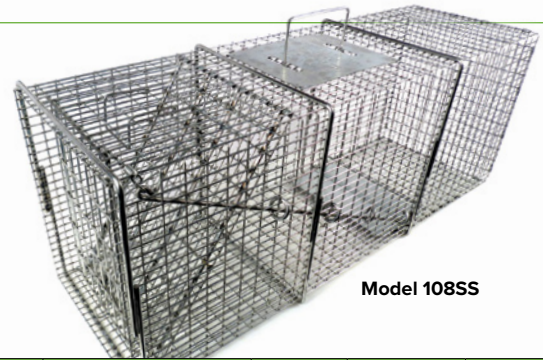

Simply put, these are the best of the best and are built to withstand years of daily use. They are manufactured in the USA at our facility in Wisconsin and backed with a one-year warranty against defect. Each trap is inspected and tested before it is shipped to you, our valued customer.

PRODUCT HIGHLIGHTS

- Powerful spring loaded, locking trap doors
- Tight mesh throughout the trap
- Heavy duty components and frame
- Critter Proof pan protection on all 9 x 9 and larger traps
- Many sizes and styles for any situation
- Add mounting loops for \$5.00
- Add a sheet metal bait area cover for \$10.00
- Add powder coating for an additional 15%

the Tomahawk Professional Series Traps Include:

- 1/4" Steel Rod Frame
- Trip Pan Protection System
- Tight mesh patterns
- Adjustable trigger
- Powerful trap door springs.

109SS	Extra Large - Raccoon and Groundhogs	36 x 12 x 12	1/2 x 1 - 14 gauge	16 lbs	\$109.70	\$98.73

Easy animal release - Easy release door provides the safest and easiest way to release trapped animals.

Easy trap baiting - Baiting is much easier when done from the back of the trap with the easy release door removed. You no longer have to reach through the front of the trap and risk setting it off.

Simple to operate - Unsnap the latch which holds the easy release door in place, and remove it by lifting up on the attached handle.

Model 608SS

Model 108.6SS

Calms wary animals - Trap doors at both ends allow animals to see through the trap without obstruction and enter with confidence.

Allows entry from either end - Trap doors at both ends allow animals to enter the trap from either end, increasing your chances of success.

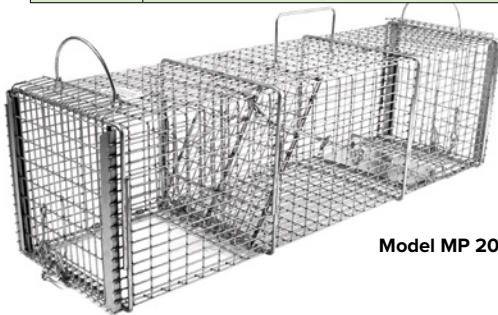

Two locking trap doors - When an animal sets off the trap by stepping on the trip pan, both spring loaded doors instantly snap shut and lock into place, making escape virtually impossible.

One Flush Mount Door - Allows the trap to be flush mounted against den openings when the door is open and the trap is armed. This makes it a "positive set" trap because the animal must enter the trap when exiting its den.

Set as Single Or Double Door - Traps with two trap doors are more versatile because they can be set with only the front door as a baited trap or set both trap doors to use as a bait-less runway trap.

Traps with Two Trap Doors Featuring One Flush Mount Door

Model	Suggested Target Animal Size	L - W - H	Construction	Wt	Price	6+

Chris Powers
Operations Coordinator

Comstock Series Traps

Comstock Series Traps are the strongest professional series traps available. These traps can be used in any position making them the best choice for positive sets.

They feature a wire trigger mechanism rather than a trip pan. This allows them to be set at any angle including vertical.

Tight mesh pattern throughout the trap to prevent animals from reaching in from the outside to steal bait and also from doing property damage after being trapped.

Strongest door springs of any cage trap available. The powered doors shut instantly allowing no chance of escape.

Heavy duty $\frac{1}{4}$ " steel frame wrapped with galvanized $\frac{1}{2}$ x 1 wire mesh and powder coated black.

PRODUCT HIGHLIGHTS

- **Powerful Trap Door Springs** - Comstock Series Traps feature our most powerful trap doors and instantly snap into place when the trap is triggered.
- **Set in Any Position** - After the trap is set it can be placed in any position including vertical making it a great trap for chimney sets and awkward positions.
- **No Trip Pan** - Comstock Series Traps are triggered by a swinging wire trigger mechanism or swinging panel which allows you to capture trap wise animals that are likely to avoid a standard trip pan trap.
- **Powder Coated**. All Comstock Series Traps come with a powder coated finish. (Excluding swing panel traps.)
- **Made in the USA**. Manufactured by Tomahawk Live Trap at our facility in Hazelhurst, Wisconsin.
- **Quality Assured**. Each trap is quality inspected and tested before it is shipped to you, our valued customer.

Model C911TD-36

Super strong coil springs - Powerful trap doors instantly snap into place when the trap is triggered. This prevents animals from backing out when the trap fires.

Locking trap doors - Locking doors prevent animals from escaping, even if the trap is flipped upside down.

WIRE TRIGGER - Comstock traps are triggered by a swinging push bar with wire triggers which allows you to capture the most trap shy animals that avoid a standard trip pan.

Function in any position - Can be set standard, upside down, sideways, or vertically.

COMSTOCK TRAPS COME POWDER COATED (except swing panel traps)

Two trap doors - Comstock double door traps feature two very powerful locking trap doors.

Versatile - Double door traps can be set as a single door trap with bait or set both trap doors to use as a bait-less runway trap. Traps featuring flush mount doors can also be placed as a positive set against entry points on structures or den openings.

Set in any position - Comstock traps can be set in any position making them an excellent choice for chimney and roof mounts.

Model CB12DD

Model CB39DD
Double Door Beaver Trap

Comstock Beaver Trap

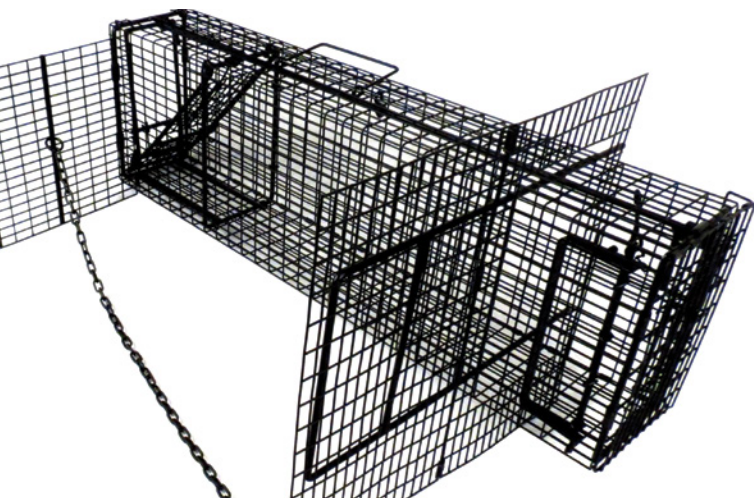

Model CB39DD is a unique beaver trap. It is designed for beavers and otters as a swim through trap to be used in water but can also be used on land. This heavy duty professional beaver trap is triggered by a swing bar wire trigger mechanism which allows you to capture the most trap shy animals and does not have a trip pan for animals to avoid. It is especially effective for using in a beaver dam set by punching a hole into the dam and placing the trap upstream just before the hole. When a beaver hears the trickle of the water it will come to plug the dam and pass through the trap setting it off and capturing it inside.

Model	Description	L - W - H	Construction	Wt	Price
CB39DD	Double Door Beaver Trap with Wire Trigger	39 x 18 x 12	1½ x 1½ - 12 gauge	23 lbs	\$264.45
CB39DDED	Double Door Beaver Trap with Wire Trigger and Otter Escape Door	39 x 18 x 12	1½ x 1½ - 12 gauge	23 lb	\$280.35

Comstock 12x12 Trap

Comstock 12" x 12" traps are made for otter, beaver, large raccoon and similar size animals. Like the larger swim through Comstock Beaver Cage Trap, the 12x12 double door model can be used for beaver in a dam setting by punching a hole in the dam and placing the trap in front of the hole to capture a beaver that is coming to repair the dam. It can also be used in tighter runs or on land. This trap also uses a swing bar wire trigger mechanism. 12 x 12 traps are also available with a tighter ½" x 1" wire mesh in a double door, single door, single door with bait door and single door with release door style.

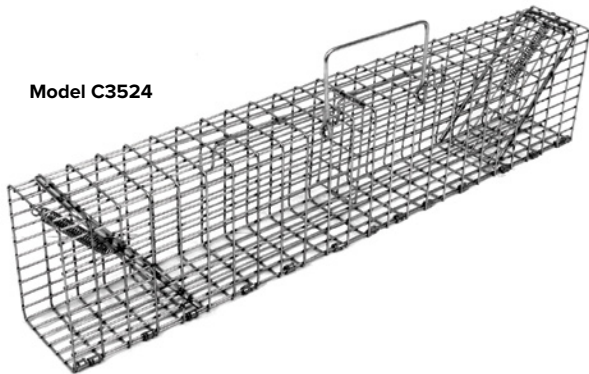

Model	Description	L - W - H	Construction	Wt	Price
CB12DD-36	36" Double Door with Wire Trigger	36 x 12 x 12	1½ x 1½ - 12 gauge	16 lbs	\$158.45

C12SD-36	36" Single Door with Wire Trigger	36 x 12 x 12	½ x 1 - 14 gauge	16 lbs	\$137.25

Model C59CHIM is a trap designed to capture raccoons living in chimneys. It is designed to be dropped into a chimney from the top, and can be completely hidden from sight. It consists of the trap, trap flap, trap flap chain, trap stop, and chimney top mesh screen. The trap stop allows you to drop the trap into the chimney at any depth you prefer, the chimney top mesh screen will rest under the trap stop to prevent raccoons from entering the chimney from the outside. The trap flap will prevent raccoons from exiting the chimney and avoiding the trap. After the trigger mechanism is set with the trap stop in place, the trap can be lowered into the chimney.

Comstock Chimney Trap

Model	Description	L - W - H	Construction	Wt	Price
C59CHIM	30" Chimney Trap	30 x 5 x 8	1/2 x 1 - 14 gauge	9 lbs	\$153.70

Model C3524

Comstock Series Swing Panel Traps

- No Trip Pan- Comstock Series Swing Panel Traps are triggered by a swinging panel mechanism set off when an animal bumps into it while trying to get through the trap.
- Two Trap Doors - These swing panel traps feature two trap doors allowing for bait-less runway setting. The 3x5" trap is especially great for setting in gutters to catch squirrels using them as pathways.
- Flush Doors - Both trap doors are flush mount doors so the trap can be placed directly over entry/exit points.
- Versatile - Can also be set as a single door trap with bait by simply placing bait beyond the trigger panel and only setting one trap door. These traps can also be converted to multiple catch colony traps by simply removing the door spring.

Excluder Specialist

The Tomahawk Feral Cat Traps

We worked closely with the Neighborhood Cats, Fix Nation and other rescue organizations around the country to design a series of traps and handling equipment made specifically for feral cats.

Feral Cat Series Traps include extra features for the safe capture and handling of feral cats. An extra large hand protector on the top of the trap prevents the handler from being scratched or bitten when transporting a trapped animal. An extra large trip plate in the trap prevents cats from stepping over the trip plate to avoid capture. A rear sliding access door with a lock on top of the trap makes transfer of cats, baiting and releasing almost too easy. A strategically placed tight mesh pattern at the rear of the trap prevents cats from reaching in and stealing the bait from the outside.

The Neighborhood Cats Drop Trap also offers a unique method for catching trap shy cats or a group of cats at one time.

Tomahawk Feral Cat Series Traps are simply the most effective feral cat traps available and offer a safe and reliable way to help reduce feral cat populations around the world.

PRODUCT HIGHLIGHTS

- XL Trip pan prevents cats from stepping over and stealing bait without being captured
- Easy release door provides the safest and easiest way to bait, transfer, and release trapped cats.
- XL Hand guard for added protection from scratches and bites
- XL double handles for lifting and transporting
- Strategic mesh pattern to prevent cats from reaching in and stealing bait

MADE IN THE USA

Model 608NC

Feral Cat Series Traps Feature:

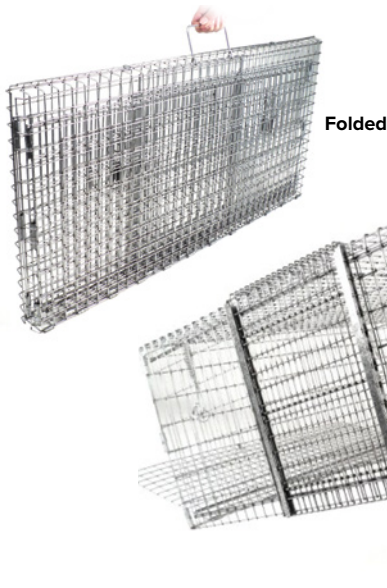

- Extra large trip pan to prevent cats from stepping over it to steal the bait and not get caught.
- Extra large hand guard for added protection from scratches, also convenient for labels.
- Easy release door provides the safest and easiest way to release trapped animals.
- Extra large, double trap handles makes lifting a breeze, as two hands can be used to lift and stabilize the trap.

Our Collapsible Neighborhood Cats Drop Trap is sturdy, yet light weight at just 18 lbs. It sets up easily in seconds with no tools required and measures 36" x 36" x 14" when deployed. It collapses just as easily and measures 36" x 18" x 4" for easy transport or storage. This convenient trap allows you to catch those wary, trap shy cats that won't enter traditional traps. It comes with an attached prop, easy release door, attached weight flap, and transfer cage spring clips. The easy release door is sized to match perfectly with our model 306NC transfer cage. The spring clips allow you to securely attach the transfer cage to the drop trap eliminating the need for cumbersome and less effective bungee cords. And the weight flap allows you to secure the trap to prevent trapped cats from sliding the trap around.

- Drop traps can be purchased separately or with an included transfer cage as a KIT for greater savings.
- A remote control trigger is also available for model DT1. It can be purchased separately or in a KIT for greater savings.

Neighborhood Cats Kitten Screen

The Neighborhood Cats Kitten Screen allows you to catch kittens only. It is designed with a unique 3"x 3" opening that blocks mature cats and allows kittens only to enter the trap. It installs easily in seconds with no tools required. Fits trap models 206NC, 606NC, 608NC, 608FN, 108, and 608.

Trap Caddie

NC1012 - clear sliding rear door

"See Through" Clear Rear Sliding Door for 10 x 12 Feral Cat Traps. The Neighborhood Cats "See Through" Rear Release Door is designed to fool the smartest and most trap shy cats. The clear acrylic rear release door allows cats to see completely through the trap and fools them into believing they can walk through. NC1012 is designed to fit trap models 606NC, 608NC, and 608FN.

Miscellaneous Accessories

DTRA	Drop Trap Mounting Bracket and Prop - for use with Remote Control Trigger System	\$21.15	\$19.04

Cat Den/
Animal
Carrier

These units provide animals a quiet place to hide within larger holding pens. They can also be used as transfer cages as they match up nicely to the easy release door of our cat traps and cages.

Our cat dens are easy to disinfect as there are no nuts or bolts protruding into the inside of the unit. They have an acrylic sliding door to allow handlers to check on animals without disturbing them. And they have a porthole door with flip down cover. Simply close the porthole door to secure the animal inside, then remove the unit from the cage for cleaning, treatment, or transport.

Animal Shield

This hand shield was designed to fit our plastic Cat Dens. It measures 9.5W x 10.5H. The hand shield provides protection from scratches and bites and gives the handler control of the animal for examinations or injections.

Cat Den/Animal Carrier

302	Opossum, Rabbit, Skunk	16 x 9 x 10	1 x 1 - 14 gauge	5 lbs	\$46.75	\$42.08
304	Raccoon, Feral Cat	20 x 11 x 12	1 x 1 - 12 gauge	7 lbs	\$54.90	\$49.41

Transfer Cages

One entire end of these cages is a sliding door designed especially for easy transfer of animals from a "Easy Release" trap. Our transfer cages are built to specific sizes that match traps with easy release doors. Simply line up the door end of the cage with the easy release door of your trap, and pull the release doors up and out of the way. After the animal is moved to the cage, replace the door and latch into place. Your trap can now be redeployed.

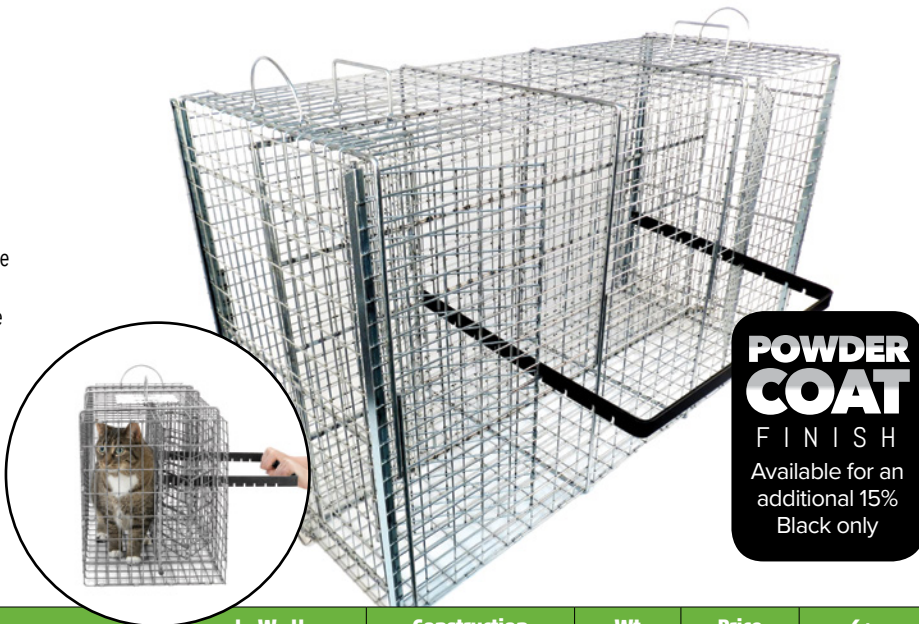

Model	Suggested Animal Sizes	L - W - H	Construction	Wt	Price	6+

307DD	Small Dog, Fox	26 x 12 x 16	1 x 2 - 12 gauge	11 lbs	\$87.90	\$79.11

Restraint Modules

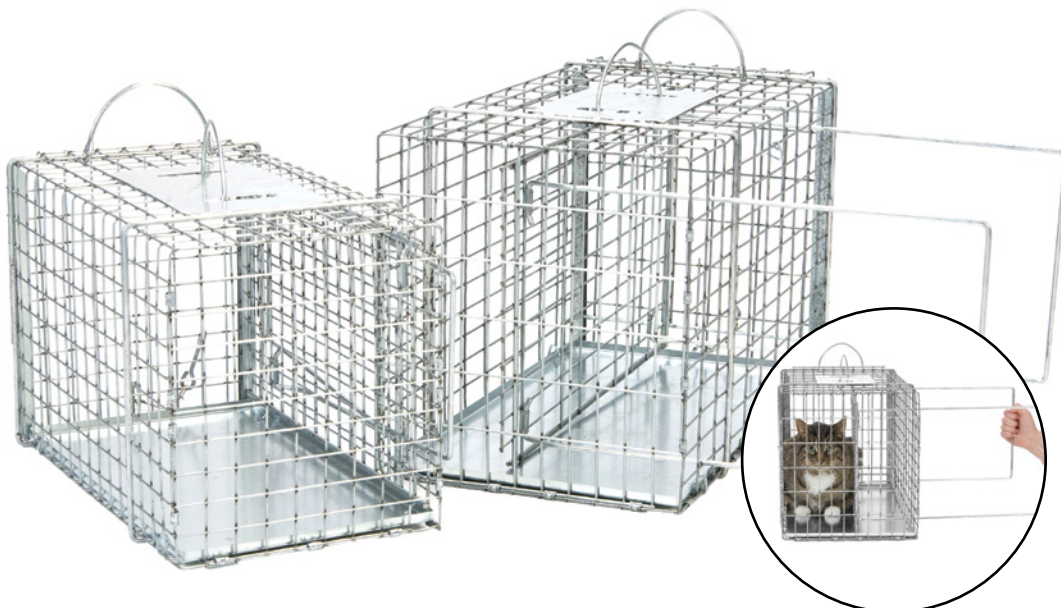

Restraint Modules are specifically designed for easy handling of animals during injections, examinations, or anytime absolute control of the animal is a must. The sliding panel locks into any position the handler desires, and will comfortably hold the animal. The restraint module can be operated with one hand and only requires one individual to operate. Heavy reinforcing rods are welded to the wire frame for extra support and easy release doors on both ends allows for easy transferring of animals. Our restraint modules match up nicely to our traps and cages with easy release doors.

Model	Suggested Animal Sizes	L - W - H	Construction	Wt	Price	6+

TK362026	Non-Collapsible Dog Kennel Crate	36 x 20 x 26	1 x 2 - 12 gauge	28 lbs	\$170.00	\$153.00

Trap Dividers

Trap Dividers allow you to confine animals in a trap by simply sliding it down from the top or through the side of the trap.

Use the divider to isolate the animal, then open the door and replace food and water. Close the door and remove the divider.

They also make it easy to release trapped animals from traps without easy release doors. Isolate the animal with the divider near the back of the trap, open and secure the trap door, and pull the divider to allow the animal to exit the trap.

Tomahawk Trap Dividers come in a variety of sizes to fit nearly all traps and cages. There are two categories of dividers. Standard dividers are constructed from 6 gauge steel rod, and heavy duty dividers are constructed from heavier 1/4" steel rod.

Trap Flags and Trap Flag Lights are excellent tools for checking traps when they are in difficult to access locations. They provide a visual alert from a distance with an upright flag and blinking light when your trap has been sprung. The Trap Flag clips on in seconds and can be used with any make or model cage style trap. Trap Flag Light clips directly onto the Trap Flag and blinks red when the flag is upright. Trap Flag Light is excellent for checking traps at night or in dark areas like attics and crawl spaces.

Trap Wraps are made from UV stabilized and corrugated plastic which makes them durable, waterproof, and washable. They are easy to install with no tools required. They are proven to reduce animal stress and injuries. And they protect animals from wind, rain, sun, and other elements. They also hide trapped animals from people who might become alarmed. We'll install Trap Wrap free with the purchase of any corresponding trap. Trap Wraps are very affordable and we strongly recommend permanently attaching them to your traps.

Made to Order - Our plastic trap covers are made specifically for each model of trap. This ensures an exact fit for handle cut outs and length, height and width of the trap. To select a model # for ordering use the model number of your trap and add the letters PTC in front of them. Example: For trap model 608 the plastic trap cover model would be PTC608. If you don't know your trap model number call us and we can find it for you with some information about your trap.

Protects Animals and People - Plastic trap covers not only calm trapped animals but also shelter them from weather and provide shade from the sun. They also visually hide animals from people and reduce risk of injury to trapped animals and people passing by.

Durable - Constructed from UV stabilized .090 polyethylene these covers will hold up against the elements and last for years.

Mounting Cones

Can be used to mount traps or one way excluders under soffits, on rooftops, against walls or even spiked into the ground over animal entry points. These easy to attach cones have a 1" flap on the outside edge for mounting. They fit over the trap and can be extended out past the front of the trap to be used as directional cones for funneling animals into the trap.

Roof Vent Funnels

Are collapsible funnels that can be attached over roof vents or other roof entry points to funnel animals into multiple attached traps. This funnel is available with two or four openings giving you the option to attach up to four traps at a time over a single entry point. Each opening can also be closed off if only one trap is to be used. Extra door panels can be used to make the openings smaller or larger to accommodate different sized traps. Door panels are available with openings to fit 3x3, 4x4, 5x5, 6x6, 7x7, 9x9, 9x11 Comstock, 10x10 and 10x12 traps or one way excluders. Each unit comes with a shut off panel for extra doors and one set of panels with door openings of your choice. This tool is excellent for reducing repeat trips to a job site by letting you catch multiple animals per set. It collapses to just 4" wide for easy storage and sets up in seconds.

Raccoon Specific
Nose Cone

Collapsible
Nose Cone

Collapsible Nose Cone In Use

The Alkerton Raccoon Nose Cone

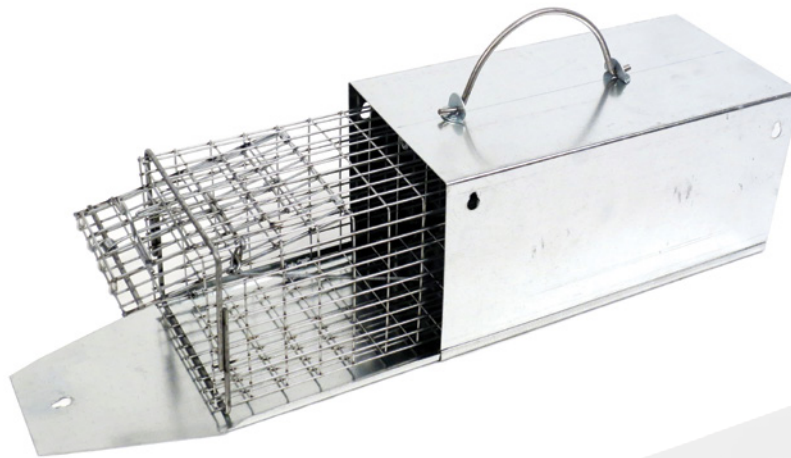

is designed specifically to catch raccoon only and prevent cats and skunks from entering the trap. These cones attach easily to the front 12x12 raccoon traps with zip ties or hog rings. The cone features a door that is easy for raccoon to open and enter the trap for bait but nearly impossible to open for cats and skunks. This cone is also collapsible for easy transportation and storage.

Excluders are included with Squirrel Packs to trap animals rather than exclude them. Refer to page 35 for Squirrel Packs.

Excluders with One Way Door

Our excluders are designed to let animals remove themselves from unwanted areas. Excluders have mounting wings which allow them to be attached directly over the animals' entry/exit hole. The one way door lets animals exit, but prevents them from returning.

Model	Suggested Target Animal Size	L - W - H	Construction	Wt	Price	6+

**Squirrel Packs-
Squirrel Pack Removal Systems**

Let the critters remove themselves with this system. It's perfect for squirrels and small rodent size animals. And it's extremely simple to use and very effective. Squirrel packs consist of one excluder and two repeating traps. Attach the excluder over the animals den opening with the mounting wings. Slide the repeating trap over the excluder and hook into place. As critters exit, the excluder will direct them into the repeating trap. There are two types of squirrel packs available, one with two trap doors and the other with one trap door and an easy release rear door.

Repeating Traps - used with Squirrel Packs

Repeating Traps are used with excluders to create Squirrel Packs. They are simply repeating traps that slide over excluders. Two repeating trap are included with the purchase of a squirrel pack, however, these repeating traps can also be purchased separately. There are two types of repeating traps available, one with two trap doors and the other with one trap door and an easy release rear door.

Bat Cones are designed to exclude bats and flying squirrels from homes. Seal all other entry points before installing Bat Cones. Bats are able to exit through the funnel but are unable to gain re-entry. After all animals have exited the home remove the cone and seal the exit point.

Squirrel Cone Excluders are designed to exclude squirrels from homes and other structures. Attach over entry point on structure and seal all other entry points. Squirrels are able to exit the cone but are unable to gain re-entry. After all squirrels have exited remove cone and seal exit point.

Ridge-Guard

Professional quality pre-formed metal screen installed over the ridge vent on houses to prevent squirrels, mice, stinging insects, birds and other wildlife from damaging ridge vents and entering homes.

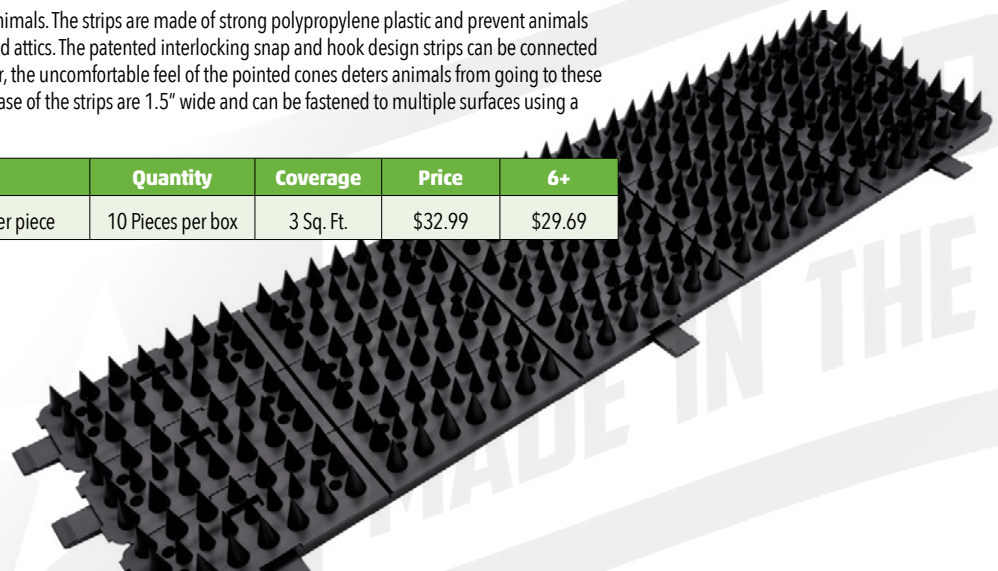

Model	Description	Price
Ridge-Guard	160 linear feet of Ridge-Guard + 200 mounting screws.	\$472.00

Critter Pricker

Is a cost-effective prevention tool for raccoons and other nuisance animals. The strips are made of strong polypropylene plastic and prevent animals from entering unwanted areas such as pools, trash cans, feeders, and attics. The patented interlocking snap and hook design strips can be connected side by side and end to end. Once wildlife touches the Critter Pricker, the uncomfortable feel of the pointed cones deters animals from going to these preferred areas while leaving the animal safe and unharmed. The base of the strips are 1.5" wide and can be fastened to multiple surfaces using a variety of materials such as screws, adhesives, and even zip ties.

Model	Description	Piece Size	Quantity	Coverage	Price	6+
CP100	Critter Pricker Animal Deterrent	18" L x 1 1/2" W per piece	10 Pieces per box	3 Sq. Ft.	\$32.99	\$29.69

Tomahawk Ferret Trap

Designed with input from the USDA and national park service at Badlands National Park. Black footed ferrets are natural predators of prairie dogs and are an essential part of the ecosystem to keep prairie dogs from overpopulation. The ferret trap was designed to safely catch black footed ferrets for repopulation efforts of the Badlands National Park area.

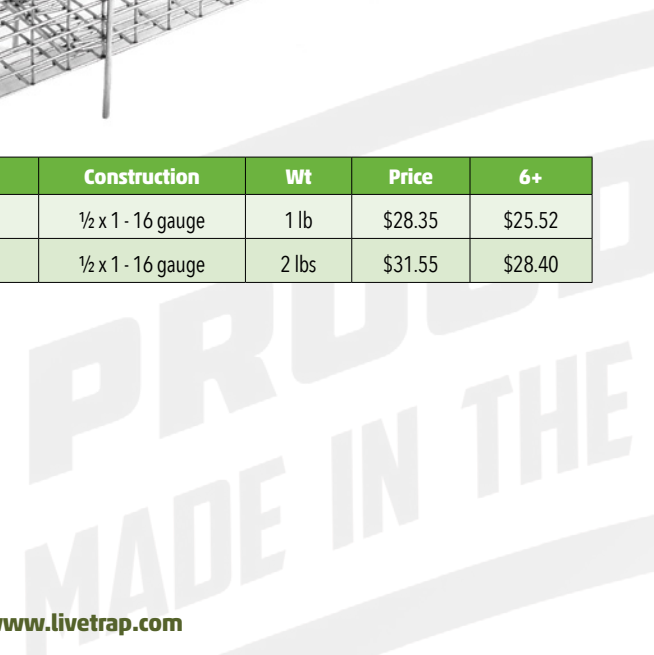

Model	L-H-W	Description	Construction	Wt	Price	6+
4436	36 x 4 x 4	Ferret trap with 6" long funnel on front end.	1 x 1 - 12 gauge	4 lbs	\$68.90	\$62.01

Ground Hugger Multiple Catch Traps

Positive set for chipmunks, gophers, and ground squirrels. Place directly over the animal's burrow, press the protruding U-Bars firmly into the ground to secure the Ground Hugger in place and let the animals trap themselves as they exit their dens. These traps also feature an easy release rear door.

H.B. SHERMAN TRAPS

PROTECTING LIFE BY DESIGN SINCE 1955

Since 1955 H.B. Sherman Traps have been the worldwide standard in sheet metal live animal traps, helping facilitate small mammal research in a safe, environmentally friendly way. They have a sensitive trip mechanism to catch lightweight animals like chipmunks, mice, voles, flying squirrels, rats, shrews, ground squirrels, and so much more.

Dura Poly Traps

Plastic traps are made from durable polyethylene and formed into one solid piece. The solid frame construction protects animals from the environment and handlers from animals. It also prevents trapped animals from reaching outside the trap and damaging the surrounding area. And it prevents animals from reaching into the trap and stealing bait.

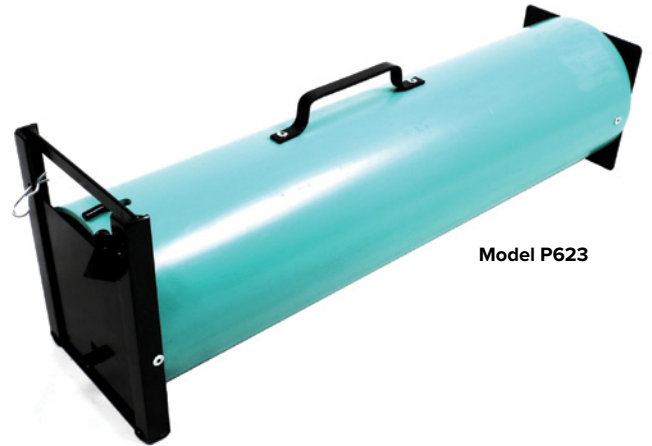

These traps are an excellent choice when animals need to be trapped in populated areas because captured animals cannot be seen from the outside, and people cannot reach into the trap and disturb the animal.

Model 924 is an excellent choice for skunk because it is completely enclosed.

Model 924

Model	Suggested Target Animal Size	L - W - H	Construction	Wt	Price	6+
924	Cats, Rabbits, Skunks, Opossum	24 x 9 x 9	Polyethylene	7 lbs	\$75.00	\$67.50

Collarum® Humane Snares

The Collarum® is one of the best and most humane canine capture devices on the market. The Collarum® throws a secure, non-choking cable loop over a canine's head and around the neck making capture faster, easier and more effective than ever before. Triggering requires a "bite & pull" action, which makes the Collarum® canine specific. It won't be set off by other wildlife.

Bird Traps

Our bird traps come assembled with small wire mesh openings, and two repeating trap doors. Birds enter the trap through funnel doors on each end of the trap. The unique design of the funnel doors encourages birds to move forward, into the traps, as they eat the bait.

Model 501, Sparrow Trap comes assembled with a convenient release door which provides easy access to trapped birds. Model 501 is constructed with small wire mesh openings, 1/2" x 1" inch, and two repeating trap doors. Tomahawk's Sparrow Trap can hold up to 20+ sparrow sized birds at one time.

Model 503, Starling Trap comes assembled with a convenient release door which provides easy access to trapped birds. This trap has 1" x 1" wire mesh openings and can hold 15+ starling sized birds at one time.

Model TT-SP15, Indoor Bird Trap is designed specifically to catch birds inside a home or commercial building. When set, the "Trap Door" is simply a welcoming platform with food. Birds stand on the platform eating happily until they press down on the perch. Suddenly, the floor gives way under them and they fall inside the ventilated box with a lid positioned securely above. When a bird is captured it will remain quiet and calm within the holding box until it can be released safely outdoors. Food and water can be left inside to protect the bird. To release the bird outside simply open the "Trap Door" lid and it will fly out.

Model 510R is our rigid chicken trap designed to catch many chickens at a time. Bait your area for several days with trap doors up then lower the trap doors when you are ready to catch chickens.

Model 511C is our collapsible chicken trap designed to catch many chickens at a time. This model collapses to just 4" thick for easy storage.

506	XL Pigeon Trap with Single Bob Style Door	42 x 24 x 12	1 x 2 - 12 gauge	15 lbs	\$94.85	\$85.37

The Bird Of Prey Trap works by placing bait in the lower section of the trap and setting the perch to hold open the trap doors. When a bird of prey lands on the perch to investigate, the perch gives way under the weight of the bird, causing the trap doors to close above them. When deployed the trap measures 36L x 36W x 42H. This trap ships disassembled for lower ship cost. An instructional assembly video is available on the instructions page of our website and on our YouTube Channel.

The Intimidator Avian Deterrent

A professional quality visual and motion deterrent for woodpeckers and other birds. This high quality deterrent requires very little air current to create a dynamic, colorful, flash and spin effect to deter birds and other wildlife from unwanted areas.

Model	Description	Price	6+
INTD1	Professional Avian Deterrent - Flash & Motion Device	\$29.50	\$26.55

Model 801

Model 801 - Bailey Beaver Trap. This trap is constructed with a heavy duty aluminum frame and chain link mesh. It is triggered when a beaver swims over the trap and bumps the T-bar, causing the spring loaded aluminum jaws to snap into place.

Model KT04

KT04 - KORO Live Beaver Trap. This clam shell style Live Beaver Trap is similar to the Hancock trap. Constructed of a heavy duty aluminum frame and chain link mesh, this trap is built to last a lifetime. It weighs 25 pounds and folds to 6". This trap is designed to capture and hold even the largest beavers.

Model CB39DD

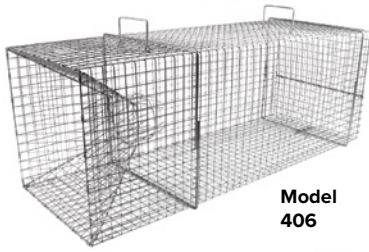

CB39DD - The Comstock Series Beaver Trap is designed for beavers and otters as a swim through trap to be used in water, but can also be used in shallow water or on land. Powerful trap doors help lift and push the animal into the trap. This trap is triggered by a swing bar wire trigger mechanism and comes with a powder coated finish.

Model CB12DD-36

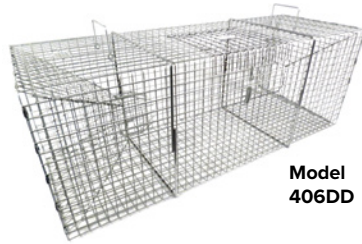

CB12DD-36 - The Comstock 12x12 Beaver Trap is designed for catching beaver or otter in tighter runs where the larger trap may not fit as well. Can be used in water or on land. This trap can also be used for larger raccoon, bobcat and similar sized animals.

Beaver Traps

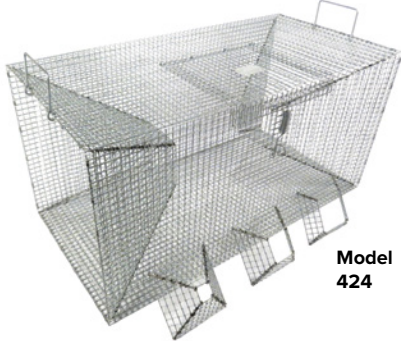

Model	Description	L - W - H	Construction	Wt	Price	6+
801	Bailey Beaver Trap	39 x 21 x 12	Aluminum Frame and Chain Link Mesh	29 lbs	\$401.70	\$361.53

Model 406

Model 406DD

Model 424

Model 425

Model 406 is an extra-large fish trap with one large funnel trap door entrance and a release door on the opposite end. Funnel entrance is approx. 4" diameter and can be adjusted smaller.

Model 406DD is an extra-large fish trap with two large funnel trap doors and a release door on the top of the trap. Funnel entrance is approx. 4" diameter and can be adjusted smaller.

Model 406W is a pair of extension wings that can easily be added to the front entrance of Model 406. The extensions act as an extremely large funnel system that reaches out 42" on each side of the trap. This greatly increases the number of fish funneled into the trap.

Model 424 is a Perch / Minnow trap with two trap door funnel entrances. This trap comes with three sets of additional funnel sizes that can be used to change the trap door size from 4"x4" down to 3"x3", 2.5"x2.5" or 2" x 2". These cone sizes can be easily attached with zip ties or hog rings.

Model 425 is a Rough Fish / Catfish trap. It features a three cone funnel system, release door and bait compartment.

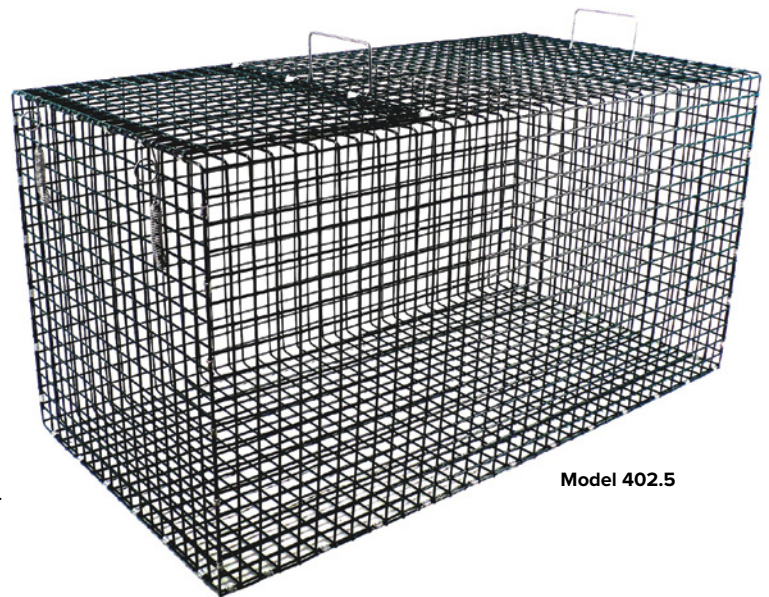

Fish Traps

Model	Description	L - W - H	Construction	Wt	Price	6+

424	Perch / Minnow Funnel Trap with Changeable Funnel Sizes	30 x 15 x 15	½ x ½ - 16 gauge	12 lbs	\$84.80	\$76.32
425	Funnel Trap for Rough Fish including Catfish	52 x 19 x 19	1 x 2 - 12 gauge	19 lbs	\$132.50	\$119.25

Keep your fish alive and kicking when you are not ready to clean them for the day. Our fish live boxes are a great addition to any dock on the lake or river. Keep the live box in the water when storing fish and simply lift it out to access your days catch. The top opening door features two locks to prevent animals from entering and stealing fish. Made of sturdy 14ga galvanized mesh these live boxes will last for many years.

Model 402.4 & 402.5 - Coated, Rigid Fish Live Boxes - The mesh of these live boxes are made from the same plastic coated wire mesh as lobster pots to prevent corrosion. Features a locking top door to keep out predators such as otter.

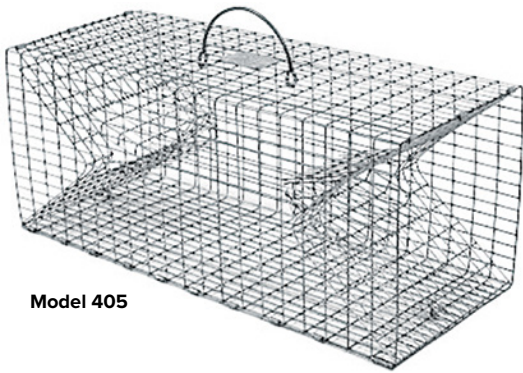

Model 402.4C & 402.5C - Coated, Collapsible, Fish Live Boxes - The mesh of these live boxes are made from the same plastic coated wire mesh as lobster pots to prevent corrosion. Features a locking top door to keep out predators such as otter. These live boxes also collapse to just 2" thick for easy storage and transportation.

Model 402.5

402.5C	Collapsible Coated Fish Live Box - Large	36 x 18 x 18	1 x 1 - 14 gauge	11 lbs	\$90.10	\$81.09

Model 405

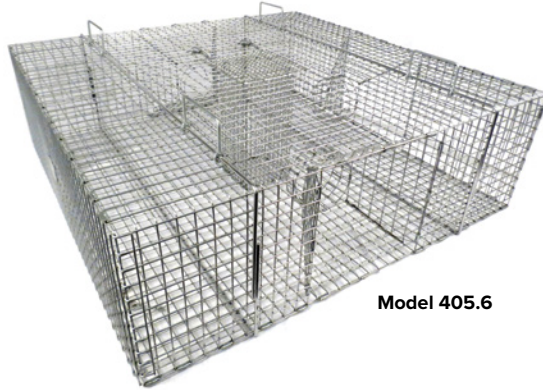

Model 405 is a multiple catch crayfish trap with two funnel style doors. This entire trap is made of 1/2" x 1" wire mesh to catch even small and medium sized crayfish. One entire side can be opened as a release door to easily unload your catch.

Model 405.5 is a multiple catch trap for crayfish, crab, and shrimp. This trap is made from 1x1" galvanized wire mesh and features four, 3" wide cone doors that funnel animals into the trap. This trap also features a 4x4" bait box inside the trap made of 1/2" x 1/2" mesh to allow the bait to be seen and smelled but not accessible which allows more animals to enter the trap. One entire side of this trap can be quickly unlatched and opened to allow for easy unloading of your catch.

Model 405.6 is our extra-large crayfish, crab, and shrimp trap featuring three funnel style trap doors. This heavy duty trap is constructed from 1 x 1" - 12 gauge galvanized wire mesh. It includes a 5 x 5" built in bait box constructed from 1/2 x 1/2" galvanized mesh. One entire side of the trap can be quickly unlatched and opened to allow for easy unloading of your catch.

Model 405.5

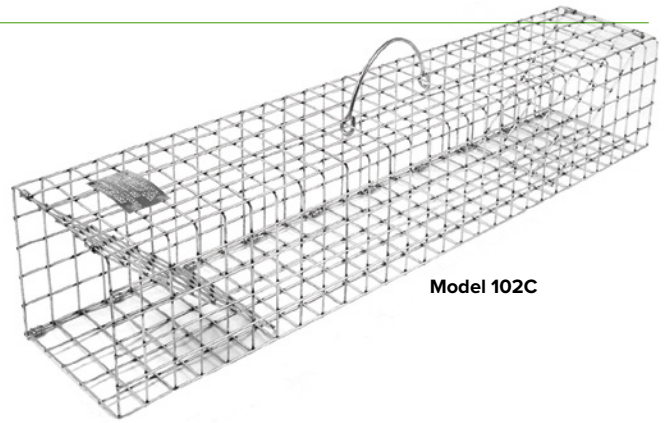

Model 405.6

Crawfish, Crab & Shrimp Traps

Model 403
Collapsible Turtle Trap

Model 410 Repeating
Turtle Trap

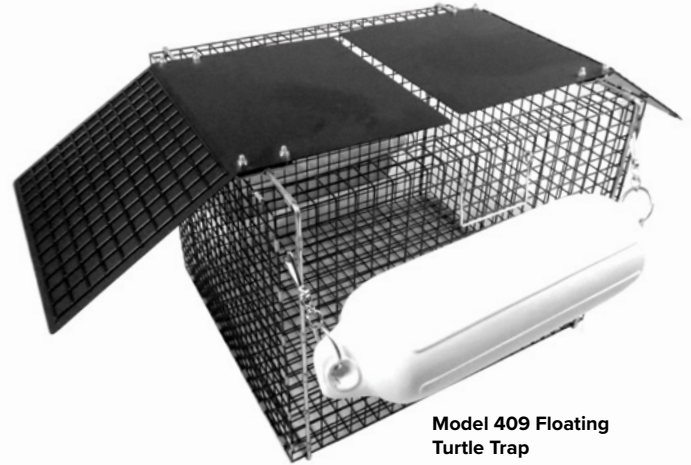

Tomahawk Turtle Traps

Model 403 & 404 are single catch collapsible turtle traps that use a trip pan to trigger the door. Place the trap mostly submerged and bait with raw fish tied inside the rear of the trap behind the trip pan. These traps collapse to just 1" thick for easy storage and transportation and can be deployed in seconds with no tools required.

Model 403R & 404R are single catch rigid traps that use a trip pan to trigger the door. Place the trap mostly submerged and bait with raw fish tied inside the rear of the trap behind the trip pan. These traps collapse to just 1" thick for easy storage and transportation and can be deployed in seconds with no tools required.

Model 409 is a floating turtle trap designed to catch many turtles at a time. When turtles climb up on the black coated aluminum ramps to sun themselves the gravity trap panels tip inward forcing the turtles to slip into the live trap.

Model 410 is a repeating trap for large turtles such as snapping turtles. It can catch and hold 6+ turtles at a time. Place the trap mostly submerged and bait with raw fish inside the trap. Turtles can push in the repeating trap door but cannot push it open from the inside. This trap is also equipped with a bait access door near the rear of the trap.

Model 409 Floating
Turtle Trap

Model	Description	L - W - H	Construction	Wt	Price	6+
403	Collapsible Turtle Live Trap for up to 40 lbs	32 x 18 x 9	1 x 2 - 12 gauge	11 lbs	\$105.55	\$95.00
404	Collapsible Turtle Live Trap for up to 100 lbs	40 x 24 x 11	1 x 2 - 12 gauge	19 lbs	\$146.80	\$132.12

410	Repeating Catch Turtle Trap for Large Turtles	42 x 23 x 12	1 x 2 - 12 gauge	17 lbs	\$103.35	\$93.02

Bullfrog Trap

Our repeating bullfrog trap is designed to hold 20+ frogs at a time. It features two one way entry doors and a top access release door. The two repeating trap doors are made of clear acrylic bobs that allow easy entry. To bait suspend a spinner blade (no hook) with fishing line in the center of the trap as a lure. The flashing of the spinner will attract bullfrogs into the trap.

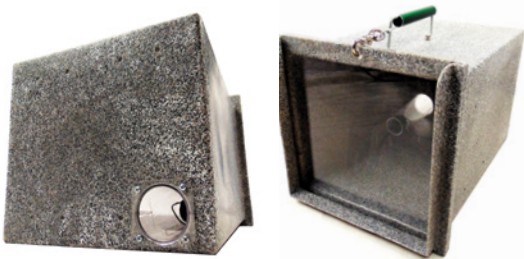

Model	Description	L - W - H	Construction	Wt	Price	6+
420	Repeating Bullfrog Trap	24 x 24 x 8	1 x 1 - 14 gauge	8 lbs	\$105.95	\$95.35

Snake Trap

Model 460 and 460XL are repeating snake traps that function as a funneling system to catch snakes. The funnel opening of model 460 is a 1.5 inch diameter and the opening of model 460XL is 3 inch diameter. They can both be adjusted tighter if needed for smaller snakes. Both come with a Powder Coated finish to add extra solar heat to the trap enticing snakes to enter. The traps feature wings that can be extended to the sides for funneling snakes into the trap. There is also a removable back door for easy release that features a welded on metal plate for bite protection while removing the rear door lock.

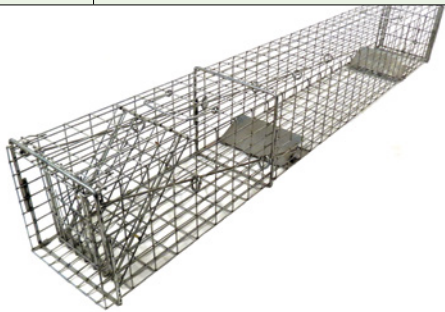

Model	Description	Construction	Size	Wt	Price	6+
460	Repeating Snake Trap	½ x 1 - 16 gauge	24 x 8.5 x 8.5	6 lbs	\$79.50	\$71.55
460XL	Large Repeating Snake Trap	½ x 1 - 14 gauge	36 x 12 x 12	12 lbs	\$111.30	\$100.17

Plastic Repeating Snake Traps

A repeating plastic snake trap designed for catching small and medium size snakes up to 1-1/2" thick. The trap is made from durable polyethylene and will hold up to the elements for many years. Trap is baited with scent lure and heat packs or caged mouse inside the trap. Snakes can pass through the cone with a repeating door but cannot push back out. The trap features a clear or tinted plastic door for easy viewing and removal of trapped snakes.

Model	Description	L-W-H	Wt	Price	6+
465W	Dura-Poly Plastic Repeating Snake Trap - White with Clear or Tinted Door	17 x 12 x 12	6.3 lbs	\$79.95	\$71.96
465G	Dura-Poly Plastic Repeating Snake Trap - Grey with Clear or Tinted Door	17 x 12 x 12	6.3 lbs	\$79.95	\$71.96
465T	Dura-Poly Plastic Repeating Snake Trap - Tan with Clear or Tinted Door	17 x 12 x 12	6.3 lbs	\$79.95	\$71.96

Double Pan Snake Trap

The double pan snake/reptile trap is a cage trap with a 2 pan system designed to catch large snakes or reptiles only. Snakes and reptiles have long bodies that are either dragged along the ground or very low to the ground. This enables them to press both pans at the same time and trigger the trap. Other animals such as mammals will walk over one pan at a time and not trigger the trap. This trap also features a removable rear door for easy animal release welded on metal plate for bite protection while removing the rear door lock.

Model	Description	Construction	L-W-H	Wt	Price	6+
461	Double Pan Snake Trap for Small Snakes	½ x 1 - 14 gauge	36L x 6W x 6H	5lbs	\$84.25	\$75.83

463	Double Pan Snake Trap for Large Snakes	1 x 1 - 12 gauge	60L x 8W x 8H	11lbs	\$111.30	\$100.17

Reptile / Lizard Trap

Model 450 is a repeating lizard trap designed to catch and hold multiple reptiles at a time. The doors are made of 6 gauge metal bobs that swing freely inward to let animals enter but cannot be pushed open from the inside. This trap also features an easy bait and release door on the top of the trap.

Model	Description	Construction	Size	Wt	Price	6+
450	Repeating Reptile Trap	1 x 1 - 12 gauge	32 x 18 x 9	14 lbs	\$94.35	\$84.92

All Of Our Standard Tongs Feature:

- Stainless steel aircraft quality cable
- Concealed stainless steel jaw springs
- Very strong cast aluminum handles, levers, and tong jaws
- Pistol grip handle designed for one hand operation
- Anodized tube shafts to withstand the elements
- Super Tube Tongs have all of the above and feature a .090 thick wall tube

Standard Tongs

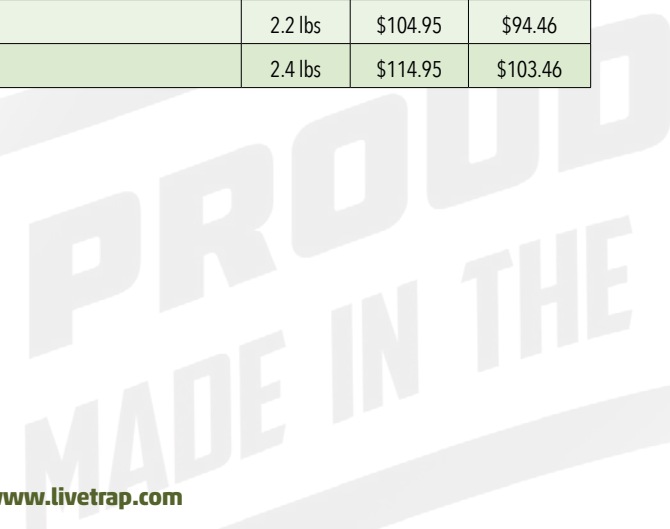

Economical, safe and effective. Our standard tongs are light weight and very durable tools that act as an extension of your arm to grab just about anything. The pistol style handle allows for a precise feel of pressure being applied. The super tube option allows you to choose a heavy duty, double thick aluminum tube for even greater durability.

All of Our Extreme Grip Tongs Feature:

- Stainless steel aircraft quality cable
- Tightest grip of all of our tongs
- Pistol grip handle designed for one hand operation
- Anodized tube shafts to withstand the elements
- Super Tube Tongs have all of the above and feature a .090 thick wall tube

Extreme Grip Tongs - Cast Aluminum

These tongs have the same great features as our standard cast aluminum tongs, except they have a different style gripping jaw preferred by some handlers. These tongs also have an exposed spring and partially exposed cable. See photo. Super tube tongs have a .090 thick wall tube.

Model FL100-C is our flashlight & attachment combo designed to work with all snake tongs, animal graspers & animal control poles. This flashlight kit attaches directly to the pole allowing you to see in dark crawlspaces and crevices while searching for snakes or animals. The powerful LED flashlight can also be detached from the holding unit quickly if needed. Flashlight and attachment can also be purchased separately.

Model STH is a support handle that can be strapped to the tube of the tong for extra support when lifting heavy snakes.

TRC & LRC are cushions that can be put on our snake tongs for extra animal protection and comfort. Model TRC is a pair of cushions for standard tongs only and model LRC is a pair of cushions for deluxe tongs only.

Reptile Containment Buckets

Made in the USA from food grade plastic resin for the safe transportation of reptiles. These buckets are heavy duty at .90 millimeters thick and include a two part lid with an outer ring that snaps into the bucket and an inner removable lid that simply spins onto the outer ring and locks into place. The inner lid has 36 drilled 1/8" air holes with each air hole protected by 1" lid reinforcement wedges making it impossible for snakes to get fangs through the air holes. This bucket has an 11" wide diameter and is 10" deep. Available in 3 or 5 gallon sizes with or without lids. Extra lids can also be purchased separately.

Solid nylon hoops. Provides strength and flexibility. These nets can be pressed firmly against the ground or wall to entrap animals even when the net shaft is at an angle. This allows handlers to stand upright while netting and restraining animals.

Long neoprene grips. Allows handlers to securely grab net shafts without slips, even when wet.

Heavy aluminum handles. The 1" aluminum tube handle provides added strength and durability.

Woven 3/4" nylon mesh netting. Does not propagate tears, unravel, or weaken from adjacent tears. Net seams are surged with polyester thread, and small mesh size prevents animal entanglements.

1/8" WOVEN NYLON HEM. Most wear and tear suffered by animal nets is to the hem that attaches the net to the hoop. This design will easily handle abrasive surfaces like concrete.

Tie-off cords. Allows handlers to secure animals in the bottom of the net.

Mini Dura-Flex Animal Net

Mini Dura-Flex Animal Nets have a 48" hoop circumference and are 44" Deep. They feature a tie off cord, comfort grip handle and flexible nylon hoop. This is an excellent net for cats and smaller sized animals.

Model	Description	Construction	Wt	Price	6+

Freeman Cage Net

Featuring a deep, soft fine-meshed net and a hoop that opens and closes by a slide on the handle. The net has a unique hoop shape to help fit into cage corners. Simple to use, gentle on the animal. Ideal for handling cats, snakes and other wildlife under 25 lbs. The net also features a zipper on the bottom to make release of the animal or examinations easier.

Model	Description	Construction	Wt	Price
FP-CC	Freeman Cage Net	12" x 38" with 1/4" Nylon Mesh Openings	2.5 lbs	\$107.65
FP-CCRC	Replacement Cable for FP-CC	Steel Cable	1 lb	\$16.50
FP-CCRN	Replacement Net for FP-CC	12" x 38" with 1/4" Nylon Mesh Openings	1 lb	\$35.35

Sometimes, netting an animal may be the only solution to capture it. We offer several sizes of nets that work successfully on a wide range of animals.

Model 3350 - Mighty Net is great for animals up to 50 lbs. It works well on cats, large birds, waterfowl, wildlife, and small to medium sized dogs. The hoop opening is 34" x 40" and the tangle free net is 48" deep with 1 3/4" mesh openings. The handle telescopes from 65" to 96".

Model 3543 - Extension Net is perfect for a wide variety of smaller animals, from bats and chipmunks, to cats and small dogs. Its D-shaped hoop has an opening of 19" x 17". Its telescoping handle reaches from 6 to 18 feet. Its soft honeycombed black tangle-free mesh provides the best design for restraining animals, and it measures 20" deep with 1/4" mesh openings.

Model 3421 - Mini Net is intended for animals up to 25 lbs. It has a hoop opening of 21" x 25". Its telescoping handle reaches from 2' to 4'. Its tangle free, nylon net is 36" deep with 1" mesh openings.

Pole Draw Nets - These nets completely collapse within the handle for easy storage. The net opens by pushing up on the handle slide and locks into place while in use. Intended for animals up to 25 lbs. such as cats, small dogs and birds.

Miscellaneous Nets

FN-LXXRN	Replacement Net for FN-LXX	18" x 16" with 1/4" Nylon Mesh Openings	1 lb	\$35.20

Throw nets are great to use when getting close to the animal is almost impossible, and conventional nets are out of the question. We offer high quality nylon throw nets with weighted perimeters. This makes them easy to throw and with great accuracy, just throw it like a Frisbee over the top of the animal. We offer several sizes.

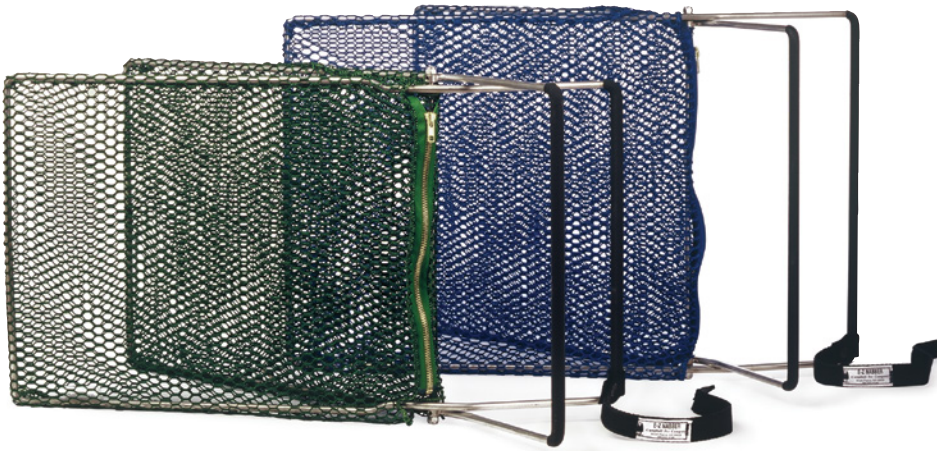

TN4 - 4' Throw Net, is great for cats, small dogs, and similar sized animals. It is 4 feet in diameter with 1" nylon mesh openings.

TN6 - 6' Throw Net, is great for small to medium sized dogs and similar sized animals. It is 6 feet in diameter with 2" nylon mesh openings.

Ensuring safety for animal handlers, saving incredible amounts of time, and providing dozens of uses, the EZ Nabber is a very smart and sound investment. In addition to providing a safe and humane way to capture animals, injections can be given through the net. Pets can be transferred from one cage to another without injury or stress to the animal or the practice staff. Pets can be removed from and/or placed in pet carriers. When the net becomes soiled, leave it on the frame and wash it in the tub with soap and water: use a disinfectant if needed. Abscesses and wounds can be flushed, and the pet can be bathed in the net. Our new 14" frame fits 18" x 18" cages.

Tomahawk Animal Control Poles provide handlers with great versatility to restrain or rescue a wide variety of animals. All of our control poles feature non-slip grips, automatic locking mechanism, spring loaded noose, protective bite guard, quick noose release knob, vinyl coated noose, and a 360 degree kink resistant swivel head. Extension poles have the added benefit of expanding when additional length is needed and retracting for storage and heavy duty use.

REPLACEMENT PARTS AVAILABLE FOR ALL ANIMAL CONTROL POLES.

Animal Graspers are essential tools for handling cats and wildlife. They provide a safe way to reach animals who have hid in smaller areas. The smoothly contoured grasper jaws are designed to restrain animals and pull them out of hard to reach areas while minimizing discomfort. The handle grip commands a steel cable, which activates the jaws. This provides the handler with a precise feel of pressure being applied to the animal.

Tomahawk offers graspers in three different categories and two standard lengths. We also custom build graspers to any desired length. Please call for quotes on custom lengths

Standard Graspers Feature:

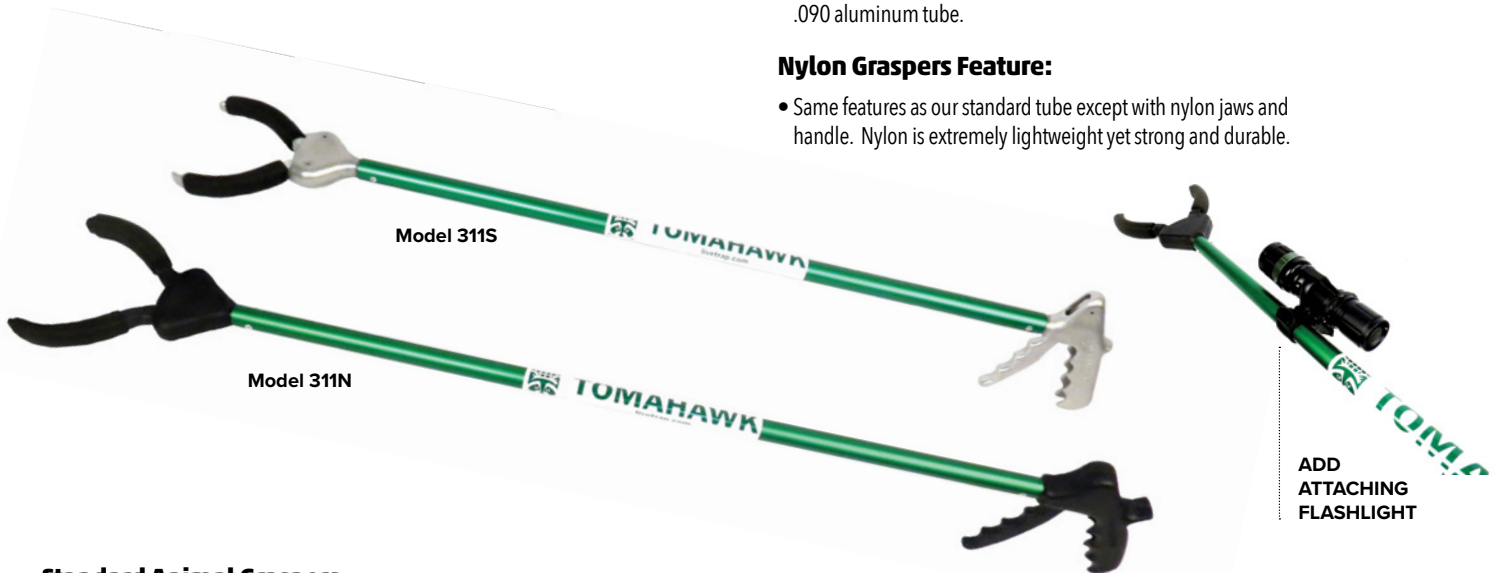

- Heavy-duty cast aluminum grasping end with two gripping jaws.
- Heavy-duty cast aluminum handle and lever.
- Stainless steel aircraft cable to connect lever to grasper end.
- Anodized aluminum tube.
- Cushioned grasper jaws for less stress to the animal

Heavy Duty Graspers Feature:

- Same features as our standard tube except with super strong .090 aluminum tube.

Nylon Graspers Feature:

- Same features as our standard tube except with nylon jaws and handle. Nylon is extremely lightweight yet strong and durable.

Model PSP32 is our Professional Syringe Pole for 3cc or 1cc syringes. It features a needle guard and aluminum syringe jacket. Simply drop your syringe into the syringe jacket and screw the jacket to the pole. When ready press the thumb operated plunger to inject. After injection, simply remove the spent syringe and throw it away. The syringe pole will fit through wire mesh as small as 1x1" for use in traps or cages.

Thumb Trigger Syringe Poles operate just like syringes at the doctor's office but with a much greater reach. They are available in 3cc and 12cc sizes and a variety of lengths. These syringe poles require a syringe to be taken apart, and screwed on to the end.

Push To Inject Syringe Poles also known as jab sticks require you to push into the animal to inject. We offer a variety of push to inject syringe poles in both 3cc and 12cc sizes including a 42"-99" extendable and attachment ends for broomstick handles. These syringe poles also require the syringe to be taken apart and pushed on to the end of the pole.

BGD - Bite Guard Deluxe

Designed to allow for very good dexterity and feel with good crushing protection. Made with 18" top-grain cowhide with Kevlar lining There is additional padding in the sleeves which makes these gloves excellent for aggressive animals.

BGL - 18" Bite Guard Glove

These gloves provide excellent protection against animal bites and scratches. Made with split-grain cowhide with a Kevlar lining, these gloves offer very good crush resistance against bites.

BGP - Bite Guard Premium

These premium quality animal handling gloves are made in the USA and feature a thick Kevlar Felt lining for puncture resistance up past the elbow. Trusted by professionals working with wildlife and domestic animals these gloves are an ideal choice for working with cats, dogs, birds, snakes and wildlife.

TM - Maxima Gloves

Maximum crushing protection. Removable top-grain padded outer layer. Inner layer features elk hide hand for dexterity plus heavily-padded sleeves. Ideal for large, dangerous dogs or other crushing-bite animals as well as raptors and large wildlife.

BEAST18, BEAST22 - BITE BUSTER BEAST GLOVES

All in one utility glove with a double layer of Kevlar and synthetic puncture resistant polymers. Designed for handling animals with great dexterity, puncture resistance, and crushing protection. Contains no animal skins.

CG - Critter Gloves

Critter gloves have been designed to give you added protection without compromising dexterity when handling animals. These gloves are made from Elk-hide and lined with Kevlar. The gauntlet is made from Cordura and lined with a special knit Kevlar. Resists sharp teeth, talons, and scratches. Covers past the elbow. Excellent for cats, birds and small mammals.

AGK - Animal Gauntlet Gloves

These gloves offer great penetration resistance with good dexterity. Kevlar-lined elk hide hand. Long or extra-long Kevlar-lined elk hide sleeve. A perfect cat and bird glove and excellent for small mammals. 18" Gauntlet covers forearm. 23" Gauntlet covers above elbow.

ARMH - ArmOrHand Gloves

These gloves are made of all synthetic material and offer hand and arm coverage up to the elbow with excellent dexterity making these excellent gloves for scuffing cats. Reinforced high-injury areas provide additional protection. The outer layer is made of durable stretch Cordura and hands are lined with double stitched Kevlar. Palms and fingertips feature textured patches for non-slip grip.

ARMHFIN - ArmOrHand Procedure Gloves

These gloves have all the same features as model ARMH listed above but also feature an exposed thumb, pointer and middle finger for performing fine motor skills.

RG - Rabies Gloves

These gloves feature an elk hide hand, lined with Kevlar, and a double layer of leather extending over the back of the hand for bite protection. Heavily padded gauntlets extend to elbow for full forearm protection. Offers high manipulability with full protection throughout.

VP03 - VET-PRO MAGNUM GLOVES

Provide superior puncture resistance and crushing protection with 400 stainless steel safety bars built into the hand, clinched on the back and front of the fingers, to disperse force and shield against penetration. Initially developed for handling primates, these gloves offer the greatest bite protection while still maintaining an ample amount of dexterity.

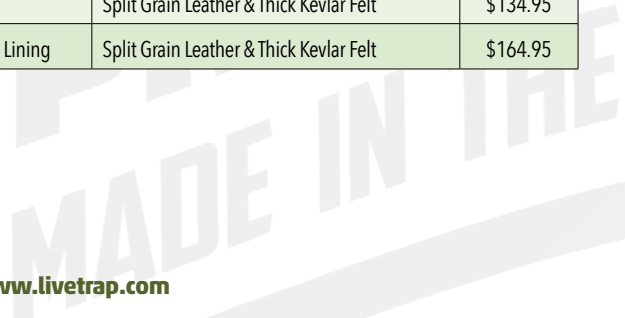

VP04 - VET-PRO WARDEN GLOVES

Features a ballistic lining of DuPont Kevlar felt. Unlike knitted or woven versions, Kevlar felt is tightly packed for maximum puncture resistance. Double stitched with Kevlar thread, with a loose fit for dexterity and emergency removal. Developed for the safe and gentle handling of dogs, cats, snakes, and small wild animals. 23" inches overall hand and cuff.

VP05 - VET-PRO WARDEN PRO-MAX GLOVES

Developed for use with feral cats, snakes, dogs, reptiles, and other animals. Double lined thick Kevlar felt in the hand and cuff portion.

Powerful enough for an outbreak and safe enough for everyday use! Rescue has more than 6 times the cleaning power of other products and works in half the time of traditional disinfectants. Rescue kills bacteria in just 5 minutes vs 10 for traditional disinfectants. Traditional disinfectants usually need to be applied twice in order to keep the surface wet for that long. Traditional disinfectants also require that you wash and rinse the surface prior to using them, and then rinse again after the 10 minute contact time is met!? WHO HAS THE TIME! With Rescue you can disinfect in one single step. Rescue is safe, fast and will not destroy your equipment like other cleaners. It is an ideal product for cleaning traps, cages or any surface that has been touched by animals. It is available in concentrate, and ready to use wipes.

CUSTOM TRAPS AND CAGES

If we don't already make what you are looking for we can make custom traps to fit your needs. We work with government organizations, professionals, wildlife control operators, and rescue groups around the world to develop traps and cages that meet their specific needs. We can customize existing products or start from scratch to make the trap, cage or accessory that will work for your situation. Call us at 800-272-8727 or email trapem@livetrap.com and ask to speak to a custom trap specialist.

REPLACEMENT PARTS

Should you ever need to replace or add parts to a trap we sell all of the parts we use to make our traps. Everything from trap doors, release doors, trip pans, springs and clips. Every part on your trap can be purchased and replaced. We even offer tools for clips and cutting. Our parts are available on our website categorized by trap model or call us and we can find the part you need.

ROLL WIRE

We sell 100' rolls of galvanized wire mesh ranging from 9" tall up to 72" tall. They are available in many different mesh patterns and thicknesses. Please call us at 800-272-8727 or email us at trapem@livetrap.com for prices and availability of sizes and styles.

On behalf of the Tomahawk Live Trap staff,
