CALL: 800-272-8727 | ONLINE: WWW.LIVETRAP.COM

Tomahawk Live Trap llc.

The Tomahawk Live Trap team is committed to providing you with the finest animal traps, cages, and animal handling equipment available. Our company mission statement is:

We aspire to exceed our customer's expectations by providing them with the highest quality humane animal control products available. We deliver our products as timely as possible, usually shipping same day. And our friendly, knowledgeable, professional staff will help inspire, educate and problem-solve for our customers so they can effectively use our products.

Our goal is to ship your products the same day they are ordered. In the event that doesn't happen, you will be notified with a phone call or an email and given an expected ship date.

Many of you have approached us with great ideas about new and improved products. We are grateful for the opportunity and the trust you have in us. We frequently build custom traps, cages, and other products for our customers, which often leads to new products and improvements to existing ones.

In fact, because of your requests, we recently committed to bringing powder coating equipment into our facility. And now we're very excited to offer powder coating on almost all of our traps and cages.

You can be assured that our products are made in the USA with pride by our team at our 30,000 square foot facility in Northern Wisconsin. And all of our products are backed by a one-year warranty against factory defects.

My wife Jenny and I attended a great many trade conferences during the past year all around our great country and we genuinely enjoyed visiting with each of you. If you should see us at one of these conferences in the future, please stop by and say hello or give us a call at 800-272-8727 to share your thoughts. We can also be reached via email at greg@livetrap.com or jenny@livetrap.com.

The team at Tomahawk Live Trap greatly appreciates you, our valued customers, for your continued support. And we sincerely want to say "Thank You".

Greg Smith

TOMAHAWK

Tomahawk Live Trap LLC

THE TOMAHAWK ORIGINAL SERIES TRAPS

Tomahawk Original Series traps are the strongest, most reliable, and most durable traps available. These traps are constructed with galvanized wire mesh frames, and have steel reinforcing rods welded to the frame for added strength.

The entire trap is galvanized to provide maximum protection against rust and corrosion. Our traps are made in the USA at our facility in Wisconsin. Backed with a one-year factory warranty, each trap is quality inspected and tested before it is shipped to you, our valued customer.

PRODUCT HIGHLIGHTS

- ▶ Spring loaded trap doors quickly snap into place preventing animals from backing out when the trap is sprung
- ▶ Locking trap doors prevent animals from escaping, even if the trap is turned over or flipped completely upside down
- ▶ Tighter wire mesh pattern around bait areas prevent animals from reaching into the trap and stealing bait from the outside
- ▶ Easy adjusting trigger system allows for light or heavy trap sets
- ▶ Brass roller and "wound-around" trigger assures nearly 100% capture rate with virtually no misfires
- ▶ Hand guards under trap handles on most models protect handlers against animal scratches
- ▶ A wide variety of trap sizes in several categories to choose from. Catch small rodents on up to large dogs

THE TOMAHAWK ORIGINAL SERIES TRAPS INCLUDE:

- SPRING LOADED TRAP DOORS
- LOCKING TRAP DOORS
- STRATEGIC MESH PATTERNS
- SURE-FIRE TRIGGER
- ADJUSTABLE TRIGGER

SUPERIOR STRENGTH - Tomahawk Original Series Traps are the most reliable traps on the market. They are built with heavy duty materials and backed by a one year manufacturers warranty. Each trap is hand tested and inspected for quality.

VERY AFFORDABLE - These traps have a single trap door and do not have a back door. This means animals must be released through the same door from which they entered the trap. The single trap door design makes this category more affordable than most of our other trap categories.

ORIGINAL SERIES - RIGID TRAPS WITH ONE TRAP DOOR

THE TOMAHAWK ORIGINAL SERIES TRAPS

THE TOMAHAWK ORIGINAL SERIES TRAPS INCLUDE:

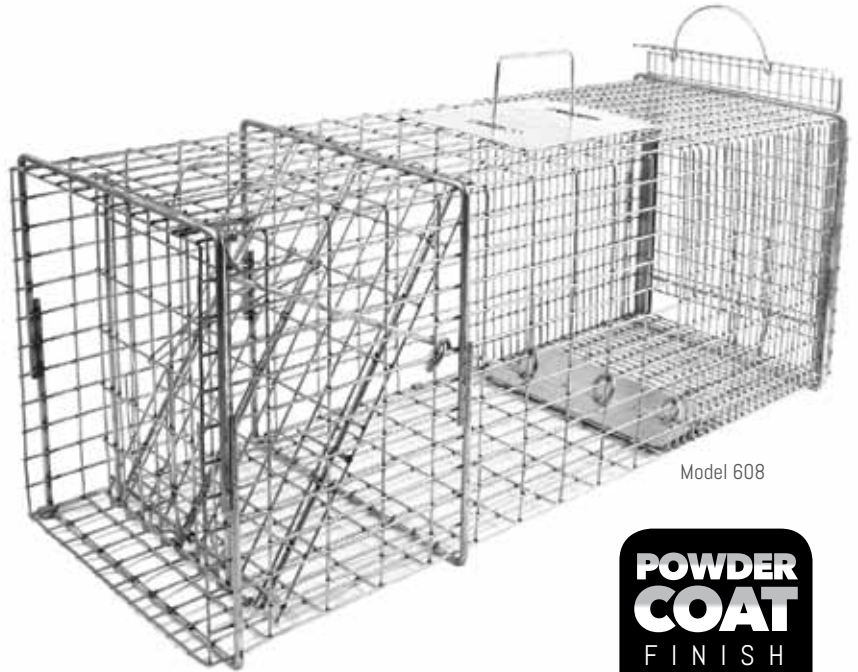

- SPRING LOADED TRAP DOORS
- LOCKING TRAP DOORS
- STRATEGIC MESH PATTERNS
- SURE-FIRE TRIGGER
- ADJUSTABLE TRIGGER

EASY ANIMAL RELEASE - Easy release door provides the safest and easiest way to release trapped animals.

EASY ANIMAL TRANSFER - Easy release door allows captured animals to be safely and easily transferred to holding or transfer cages. We offer a line of transfer cages that match up perfectly with these traps. This allows you to keep your traps in the field by transferring animals from your traps into transfer cages.

EASY TRAP BAITING - Baiting is much easier when done from the back of the trap with the easy release door removed. You no longer have to reach through the front of the trap and risk setting it off.

SIMPLE TO OPERATE - Unsnap the latch which holds the easy release door in place, and remove it by lifting up on the attached handle.

Model 107

THE TOMAHAWK ORIGINAL SERIES TRAPS INCLUDE:

- SPRING LOADED TRAP DOORS
- LOCKING TRAP DOORS
- STRATEGIC MESH PATTERNS
- SURE-FIRE TRIGGER
- ADJUSTABLE TRIGGER

CALMS WARY ANIMALS - Trap doors at both ends allow animals to see through the trap without obstruction and enter with confidence.

ALLOWS ENTRY FROM EITHER END - Trap doors at both ends allow animals to enter the trap from either end, increasing your chances of success.

TWO LOCKING TRAP DOORS - When an animal sets off the trap by stepping on the trip pan, both spring loaded doors instantly snap shut and lock into place, making escape virtually impossible.

ORIGINAL SERIES - RIGID TRAPS WITH TWO TRAP DOORS

POSITIVE SET. Allows for the trap to be flush mounted against den openings when the door is open. This is called a "positive set" because the animal must enter the trap when exiting its den.

VERSATILE. Flush mount traps can also be used as traditional bait and scent sets as well as flush mount positive sets.

THE TOMAHAWK ORIGINAL SERIES COLLAPSIBLE TRAPS

THE TOMAHAWK ORIGINAL SERIES TRAPS INCLUDE:

- SPRING LOADED TRAP DOORS
- LOCKING TRAP DOORS
- STRATEGIC MESH PATTERNS
- SURE-FIRE TRIGGER
- ADJUSTABLE TRIGGER

COLLAPSIBLE TRAPS

MINIMAL STORAGE SPACE REQUIRED - Folds flat when not in use and take about 1/10th the storage space as rigid traps.

SIMPLE TO FOLD AND UNFOLD - Traps fold flat in just a few seconds, and setup just as quickly. No tools required.

NO ASSEMBLY REQUIRED - Collapsible traps come completely assembled.

TWO TRAP DOORS (ALL OF THE ABOVE FEATURES AND MORE...)

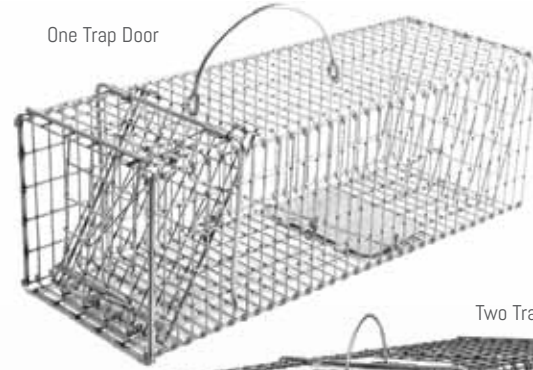

CALMS WARY ANIMALS - Trap doors at both ends allow animals to see through the trap without obstruction and enter with confidence.

ALLOWS ENTRY FROM EITHER END - Trap doors at both ends allow animals to enter the trap from either end, increasing your chances of success.

TWO LOCKING TRAP DOORS - When an animal sets off the trap by stepping on the trip pan, both spring loaded doors instantly snap shut and lock into place, making escape virtually impossible.

SET AS SINGLE OR DOUBLE DOOR - Traps with two trap doors are more versatile because they can be set with only the front door as a baited trap or set both trap doors to use as a bait-less runway trap.

TO ORDER, CALL 800-272-8727 OR ONLINE AT WWW.LIVETRAP.COM

THE TOMAHAWK PROFESSIONAL SERIES TRAPS

Tomahawk Professional Series Live Traps are the strongest, most durable, and effective traps available. These traps surpass even our renowned "Original Series" traps when it comes to toughness and durability.

They feature a very strong frame, heavy duty components, more powerful trap door springs, "critter proof" trip pan protection system and tighter mesh throughout the trap.

Tighter mesh patterns prevent animals from reaching in from the outside to steal bait. It also prevents animals from reaching out and damaging property while trapped.

Critter Proof pan guards are installed on all 7 x 7 and larger trap models to prevent animal damage. This means no more wasted time flattening bent trip pans.

Simply put, these are the best of the best and are built to withstand years of daily use. They are manufactured in the USA at our facility in Wisconsin and backed with a one-year warranty against defect. Each trap is inspected and tested before it is shipped to you, our valued customer.

PRODUCT HIGHLIGHTS

- ▶ Powerful spring loaded, locking trap doors
- ▶ Tight mesh throughout the trap
- ▶ Heavy duty components and frame
- ▶ Critter Proof pan protection on all 7 x 7 and larger traps
- ▶ Many sizes and styles for any situation
- ▶ Add four welded on roof mount / ground spike loops for \$5.00
- ▶ Add a sheet metal bait area cover for \$10.00
- ▶ Add powder coating for an additional 15%

EASY ANIMAL RELEASE - Easy release door provides the safest and easiest way to release trapped animals.

EASY TRAP BAITING - Baiting is much easier when done from the back of the trap with the easy release door removed. You no longer have to reach through the front of the trap and risk setting it off.

SIMPLE TO OPERATE - Unsnap the latch which holds the easy release door in place, and remove it by lifting up on the attached handle.

THE TOMAHAWK PROFESSIONAL SERIES TRAPS

Model 108.6SS

CALMS WARY ANIMALS - Trap doors at both ends allow animals to see through the trap without obstruction and enter with confidence.

ALLOWS ENTRY FROM EITHER END - Trap doors at both ends allow animals to enter the trap from either end, increasing your chances of success.

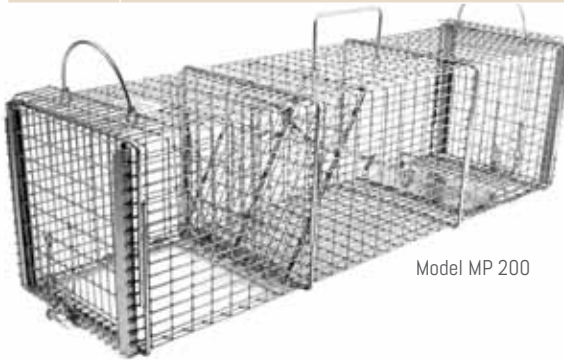

TWO LOCKING TRAP DOORS - When an animal sets off the trap by stepping on the trip pan, both spring loaded doors instantly snap shut and lock into place, making escape virtually impossible.

ONE FLUSH MOUNT DOOR - Allows the trap to be flush mounted against den openings when the door is open and the trap is armed. This makes it a "positive set" trap because the animal must enter the trap when exiting its den.

SET AS SINGLE OR DOUBLE DOOR - Traps with two trap doors are more versatile because they can be set with only the front door as a baited trap or set both trap doors to use as a baitless runway trap.

TRAPS WITH TWO TRAP DOORS FEATURING ONE FLUSH MOUNT DOOR

MODEL	SUGGESTED TARGET ANIMAL SIZE	L - W - H	CONSTRUCTION	WT	PRICE	6+
105.5SS	DD for Skunk, Prairie Dog	30 x 7 x 7	½ x 1 - 14 gauge	8 lbs	\$65.50	\$58.95

Model MP 200

POSITIVE SET - Features a unique bottom opening which allows positive setting over dens/burrows.

VERSATILE - Can be used as a flush mount trap against walls, positive set over burrows or baited and set as a standard trap.

REAR SLIDING DOOR - Rear door for easy baiting and removal of animals.

FLUSH MOUNT - Front panel can be removed to use as a flush mount, positive set trap against entry points on structures.

MULTI-PURPOSE TRAPS

MODEL	SUGGESTED TARGET ANIMAL SIZE	L - W - H	CONSTRUCTION	WT	PRICE	6+

Model 6010N

MOUNTING LOOPS - Features four mounting loops for easy quick attaching to rooftops or ground spikes.

LITTER TRAY - Removable litter tray sits under the trap floor to catch waste from trapped animals to minimize damage.

BAIT COVER - Sheet metal cover over bait area to prevent bait loss from weather and also provides shelter and hides trapped animals.

FLUSH DOOR - Positive sets against den and structure entry/exit points.

NWCOA SPECIALTY TRAP FEATURING MOUNTING LOOPS, REMOVABLE LITTER CATCHING TRAY, BAIT COVER AND FLUSH DOOR

COMSTOCK TRAPS

Model C911TD-36

SUPER STRONG COIL SPRINGS - Powerful trap doors instantly snap into place when the trap is triggered. This prevents animals from backing out when the trap fires.

LOCKING TRAP DOORS - Locking doors prevent animals from escaping, even if the trap is flipped upside down.

WIRE TRIGGER - Comstock traps are triggered by a swinging push bar with wire triggers which allows you to capture the most trap shy animals that avoid a standard trip pan.

FUNCTION IN ANY POSITION - Can be set standard, upside down, sideways, or vertically.

COMSTOCK TRAPS COME POWDER COATED (except swing panel traps)

STANDARD OR HEAVY DUTY - Comstock 9 x 11 traps are available in standard ½ x 1 - 14 gauge wire mesh or heavy duty ½ x 1 - 12 gauge wire mesh.

TWO TRAP DOORS - Comstock double door traps feature two very powerful locking trap doors.

VERSITILE - Double door traps can be set as a single door trap with bait or set both trap doors to use as a bait less runway trap. Traps featuring flush mount doors can also be placed as a positive set against entry points on structures or den openings.

SET IN ANY POSITION - Comstock traps can be set in any position making them an excellent choice for chimney and roof mounts.

STANDARD OR HEAVY DUTY - Comstock 9 x 11 traps are available in standard ½ x 1 – 14 gauge wire mesh or heavy duty ½ x 1 – 12 gauge wire mesh.

THE TOMAHAWK FERAL CAT TRAPS

We worked closely with the Neighborhood Cats and Fix Nation organizations to design a series of traps specifically for feral cats.

PRODUCT HIGHLIGHTS

- ▶ XL Trip pan prevents cats from stepping over and stealing bait without being captured
- ▶ Easy release door provides the safest and easiest way to bait, transfer, and release trapped animals.
- ▶ XL Hand guard for added protection from scratches and bites
- ▶ XL double handles for lifting and transporting
- ▶ Strategic mesh pattern to prevent cats from reaching in and stealing bait

TOMAHAWK FERAL CAT SERIES TRAPS

Model 608NC

**POWDER
COAT
FINISH**

Available for an
additional 15%
Black only

- Extra large trip pan to prevent cats from stepping over it to steal the bait and not get caught.
- Extra large hand guard for added protection from scratches, also convenient for labels.
- Easy release door provides the safest and easiest way to release trapped animals.
- Extra large, double trap handles makes lifting a breeze, as two hands can be used to lift and stabilize the trap.

609	XL Cat Trap	36 x 12 x 14	1 x 1 - 14 gauge	14 lbs	\$99.75	\$89.78

Our Collapsible Neighborhood Cats Drop Trap is sturdy, yet light weight at just 18 lbs. It sets up easily in seconds with no tools required and measures 36" x 36" x 14" when deployed. It collapses just as easily and measures 36" x 18" x 4" for easy transport or storage. This convenient trap allows you to catch those wary, trap shy cats that won't enter traditional traps. It comes with an attached prop, easy release door, attached weight flap, and transfer cage spring clips. The easy release door is sized to match perfectly with our model 306NC transfer cage. The spring clips allow you to securely attach the transfer cage to the drop trap eliminating the need for cumbersome and less effective bungee cords. And the weight flap allows you to secure the trap to prevent trapped cats from sliding the trap around.

- This trap can be purchased separately or at greater savings in a kit. KITDT1 includes a drop trap and transfer cage.
- A remote control trigger is also available that can be purchased separately or combined as a kit. KITDT2 includes a drop trap and remote trigger. KITDT3 includes a drop trap, remote trigger and transfer cage.

NC1012 - CLEAR SLIDING REAR DOOR

"See Through" Clear Rear Sliding Door for 10 x 12 Feral Cat Traps. The Neighborhood Cats "See Through" Rear Release Door is designed to fool the smartest and most trap shy cats. The clear acrylic rear release door allows cats to see completely through the trap and fools them into believing they can walk through. NC1012 is designed to fit trap models 606NC, 608NC, and 608FN.

TOMAHAWK FERAL CAT DENS/CARRIERS

Cat Den/
Animal
Carrier

These units provide animals a quiet place to hide within larger holding cages. They can also be used as transfer cages as they match up nicely to the easy release door of our cat traps and cages. Our cat handlers are easy to disinfect as there are no nuts or bolts protruding into the inside of the unit. They have an acrylic sliding door to allow handlers to check on animals without disturbing them. And they have a porthole door with flip down cover. Simply close the porthole door to secure the animal inside, then remove the unit from the cage for cleaning, treatment, or transport.

Animal Shield

This hand shield was designed to fit our plastic Cat Dens. It measures 9.5W x 10.5H. The hand shield provides protection from scratches and bites and gives the handler control of the animal for examinations or injections.

DPC1	25 Pack of Disposable Pet Carriers	17.5 x 8.5 x 15	Cardboard	25 lbs	\$75.00

TRAP DIVIDERS

Trap Dividers allow you to confine animals in a trap by simply sliding it down from the top or through the side of the trap.

Use the divider to isolate the animal, then open the door and replace food and water. Close the door and remove the divider.

They also make it easy to release trapped animals from traps without easy release doors. Isolate the animal with the divider near the back of the trap, open and secure the trap door, and pull the divider to allow the animal to exit the trap.

Tomahawk Trap Dividers come in a variety of sizes to fit nearly all traps and cages. There are two categories of dividers. Standard dividers are constructed from 6 gauge steel rod, and heavy duty dividers are constructed from heavier 1/4" steel rod.

TOMAHAWK TRAP ACCESSORIES

Trap Wraps are made from UV stabilized and corrugated plastic which makes them durable, waterproof, and washable. They are easy to install with no tools required. They are proven to reduce animal stress and injuries. And they protect animals from wind, rain, sun, and other elements. They also hide trapped animals from people who might become alarmed. We'll install Trap Wrap free with the purchase of any corresponding trap. Trap Wraps are very affordable and we strongly recommend permanently attaching them to your traps.

MADE TO ORDER - Our plastic trap covers are made specifically for each model of trap. This ensures an exact fit for handle cut outs and length, height and width of the trap. To select a model # for ordering use the model number of your trap and add the letters PC in front of them. Example: For trap model 608 the plastic trap cover model would be PC608. If you don't know your trap model number call us and we can find it for you with some information about your trap.

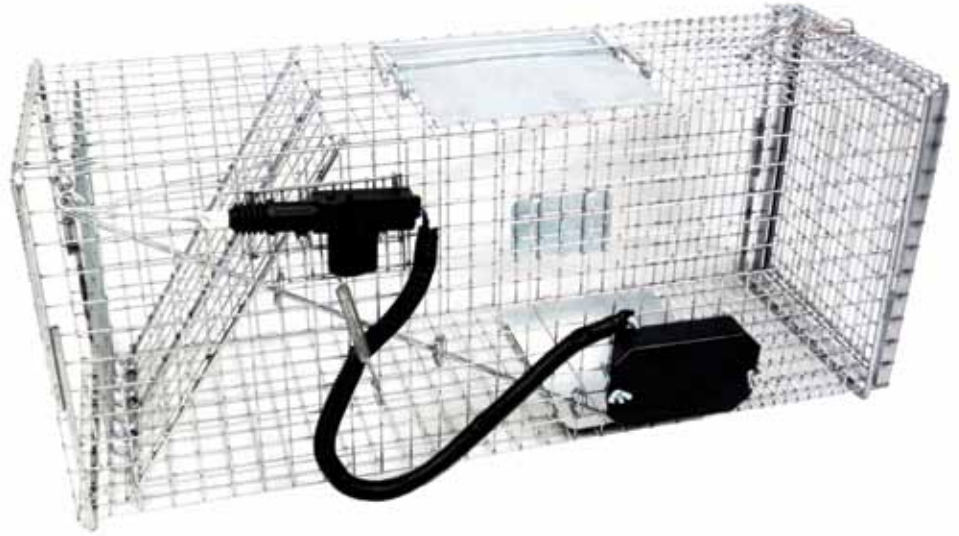

PROTECTS ANIMALS AND PEOPLE - Plastic trap covers not only calm trapped animals but also shelter them from weather and provide shade from the sun. They also visually hide animals from people and reduce risk of injury to trapped animals and people passing by.

AUTOMATIC LASER TRAP TRIGGER

ET200 – Laser Trigger Converter for Tomahawk Traps. This product eliminates the need for an animal to step on the trip plate inside the trap. It converts your trap into a fully automatic electronically controlled trap. Rather than the animal stepping on the treadle (trip pan) to trigger the trap, it simply needs to walk past the laser beam. This device is extremely effective for trap shy animals that avoid the treadle at all costs. It also works well for lightweight animals such as kittens or birds that don't have enough weight to consistently push down on the trip pan and fire the trap.

TOMAHAWK TRAP ACCESSORIES

Tomahawk Wheel Kits are perfect for transporting large traps, especially those containing animals. Each kit contains two wheels with 10" pneumatic tires that can hold up to 600 lbs. Double roller bearings on each side of the wheels provide long durability, and easy maneuverability. A lightweight aircraft aluminum axle for extra strength and durability allows for easy attachment to the bottom of the trap. The axle can stay permanently attached and the wheels can easily be removed when the trap is deployed.

WHEEL KITS

Excluders are included with Squirrel Packs to trap animals rather than exclude them.
Refer to page 26 for Squirrel Packs.

EXCLUDERS WITH ONE WAY DOOR

Our excluders are designed to let animals remove themselves from unwanted areas. Excluders have mounting wings which allow them to be attached directly over the animals' entry/exit hole. The one way door lets animals exit, but prevents them from returning.

SQUIRREL PACKS

SQUIRREL PACKS- SQUIRREL PACK REMOVAL SYSTEMS

Let the critters remove themselves with this system. It's perfect for squirrels and small rodent size animals. And it's extremely simple to use and very effective. Squirrel packs consist of one excluder and two repeating traps. Attach the excluder over the animals den opening with the mounting wings. Slide the repeating trap over the excluder and hook into place. As critters exit, the excluder will direct them into the repeating trap. There are two types of squirrel packs available, one with two trap doors and the other with one trap door and an easy release rear door.

REPEATING TRAPS AND ACCESSORIES FOR SQUIRREL PACKS

REPEATING TRAPS - USED WITH SQUIRREL PACKS

Repeating Traps are used with excluders to create Squirrel Packs. They are simply repeating traps that slide over excluders. Two repeating trap are included with the purchase of a squirrel pack, however, these repeating traps can also be purchased separately. There are two types of repeating traps available, one with two trap doors and the other with one trap door and an easy release rear door.

H.B. SHERMAN TRAPS

PROTECTING LIFE BY DESIGN SINCE 1955

Since 1955 H.B. Sherman Traps have been the worldwide standard in sheet metal live animal traps, helping facilitate small mammal research in a safe, environmentally friendly way. They have a sensitive trip mechanism to catch lightweight animals like chipmunks, mice, voles, flying squirrels, rats, shrews, ground squirrels, and so much more.

Plastic traps are made from durable polyethylene and formed into one solid piece. The solid frame construction protects animals from the environment and handlers from animals. It also prevents trapped animals from reaching outside the trap and damaging the surrounding area. And it prevents animals from reaching into the trap and stealing bait.

These traps are an excellent choice when animals need to be trapped in populated areas because captured animals cannot be seen from the outside, and people cannot reach into the trap and disturb the animal.

Model 924 is an excellent choice for skunk because it is completely enclosed.

DURA POLY TRAPS

MODEL	SUGGESTED TARGET ANIMAL SIZE	L - W - H	CONSTRUCTION	WT	PRICE	6+
924	Cats, Rabbits, Skunks, Opossum	24 x 9 x 9	Polyethylene	7 lbs	\$70.00	\$63.00
1232	Raccoon, Feral Cats, Woodchucks	32 x 12 x 12	Polyethylene	13 lbs	\$80.00	\$72.00

SPRAY PROOF SKUNK TUBE TRAPS

Tube Traps are excellent for skunk because they are completely enclosed. The trap door is closed with when an animal steps on the inside bait tray. The door shuts by gravity and locks. Available with or without a rear release door.

FISH TRAPS AND LIVE BOXES

Model 405

Model 406

Fish Traps are repeating traps which continue to catch fish while the trap is in the water. The trap doors have a special funnel design that bring fish in but doesn't let them out.

MODEL 405 CRAYFISH TRAP with two trap doors, one on each end. One trap door end can be unlatched to function as a release door.

MODEL 406 SINGLE DOOR RIGID EXTRA LARGE FISH TRAP has one large trap door located on one end and a convenient release door at the other end.

MODEL 406W EXTENSION WINGS A pair of extensions that can easily be added to the front entrance of Model 406. The extensions act as an extremely large funnel system that reaches out 42" on each side of the trap. This greatly increases the number of fish funneled into the trap. These extensions are easily installed on location.

Keep your fish alive and kicking when you are not ready to clean them for the day. Our fish live boxes are a great addition to any dock on the lake or river. Keep the live box in the water when storing fish and simply lift it out to access your days catch. The top opening door features two locks to prevent animals from entering and stealing fish. Made of sturdy 14ga galvanized mesh these live boxes will last for many years.

MODEL 402, COLLAPSIBLE FISH LIVE BOX is collapsible and sets up in seconds. It's the perfect portable live box because it can be easily folded to a compact 1" x 18" x 36".

MODEL 402.5, COATED, RIGID FISH LIVE BOX - The mesh of the live box is made from the same material as lobster pots used in salt water. It is coated with a plastic material to prevent corrosion. Features a locking top to keep predators such as otters from stealing fish.

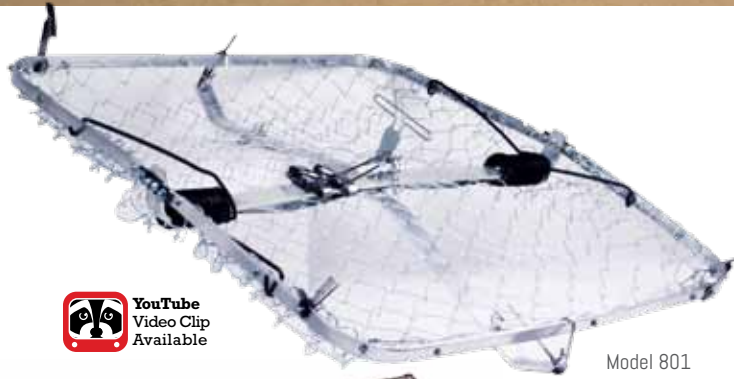

Model 402 (Collapsed)

Model 801

MODEL 801 - Bailey beaver trap. This trap is constructed with a heavy duty aluminum frame and chain link mesh. It is triggered when a beaver swims over the trap and bumps the T-bar, causing the spring loaded aluminum jaws to snap into place.

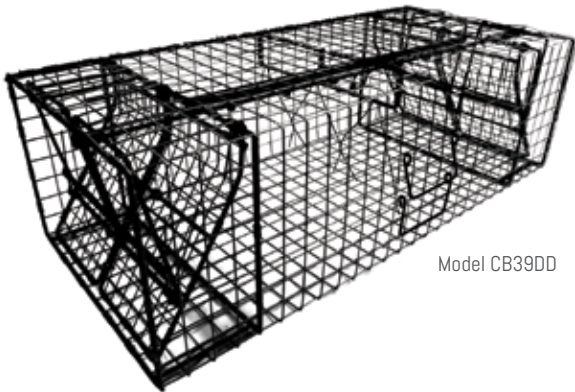

Model EZEE

EZEE - The Ezee Set Ezee Catch beaver trap is very effective for catching beavers that have established dams or blocked drainage areas. This trap is easy to set and simple to use. The most effective method for trapping a beaver in this trap is to create a hole in a beaver dam and place this trap directly in front of the hole with the bottom section of the trap below the water and the top of the trap partially out of the water. When the beaver comes to repair the break in the dam it will push against the trip bar and set off the trap.

Model KT04

KT04 - KORO Live Beaver Trap. This clam shell style Live Beaver Trap is similar to the Hancock trap. Constructed of a heavy duty aluminum frame and chain link mesh, this trap is built to last a lifetime. It weighs 25 pounds and folds to 6". This trap is designed to capture and hold even the largest beavers.

Model CB39DD

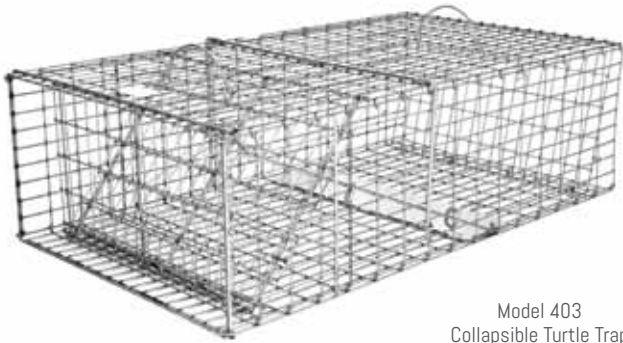

CB39DD - The Comstock Series Beaver Trap is designed for beavers and otters as a swim through trap to be used in water, but can also be used in shallow water or on land. Powerful trap doors help lift and push the animal into the trap. This trap is triggered by a swing bar wire trigger mechanism and comes with a powder coated finish.

TOMAHAWK TURTLE TRAPS & BULLFROG TRAP

Model 403
Collapsible Turtle Trap

Model 410 Repeat-
ing Turtle Trap

These traps are constructed of heavy duty 12 gauge wire mesh and steel rods. They are galvanized to provide resistance to rust and corrosion. They feature spring loaded doors with a special locking system that allows them to perform well when placed at any angle. They are strong, durable, and will last for years.

Bait these traps with dead fish, or meat of any kind and secure it to the bottom of the trap behind the trip pan. Once the bait is in

place, drop the trap into the water making sure some of the trap is above water to allow captured turtles to breath.

Collapsible turtle traps can be folded flat in seconds for easy storage. They are also less expensive to ship. We offer rigid turtle traps in the same sizes as the collapsible. Rigid traps are generally stronger than their collapsible counterpart.

Our repeating bullfrog trap is designed to hold 20+ frogs at a time. It features two one way entry doors and a top access release door. The two repeating trap doors are made of clear acrylic bobs that allow easy entry. To bait suspend a spinner blade (no hook) with fishing line in the center of the trap as a lure. The flashing of the spinner will attract bullfrogs into the trap.

Goshawk Trap - We must receive proof of a FEDERAL MIGRATORY BIRD DEPREDATION PERMIT before we can ship this trap. The hawk trap works by placing bait in the lower section of the trap and setting the perch to hold open the trap doors. When a hawk lands on the perch to investigate the perch gives way under the weight of the bird causing the trap doors to close above them. When deployed the trap measures 36L x 36W x 42H. The trap ships disassembled for lower shipping cost. An instructional assembly video is available on our instructions page and YouTube Channel.

SMALL BIRD TRAPS AND CHICKEN TRAPS

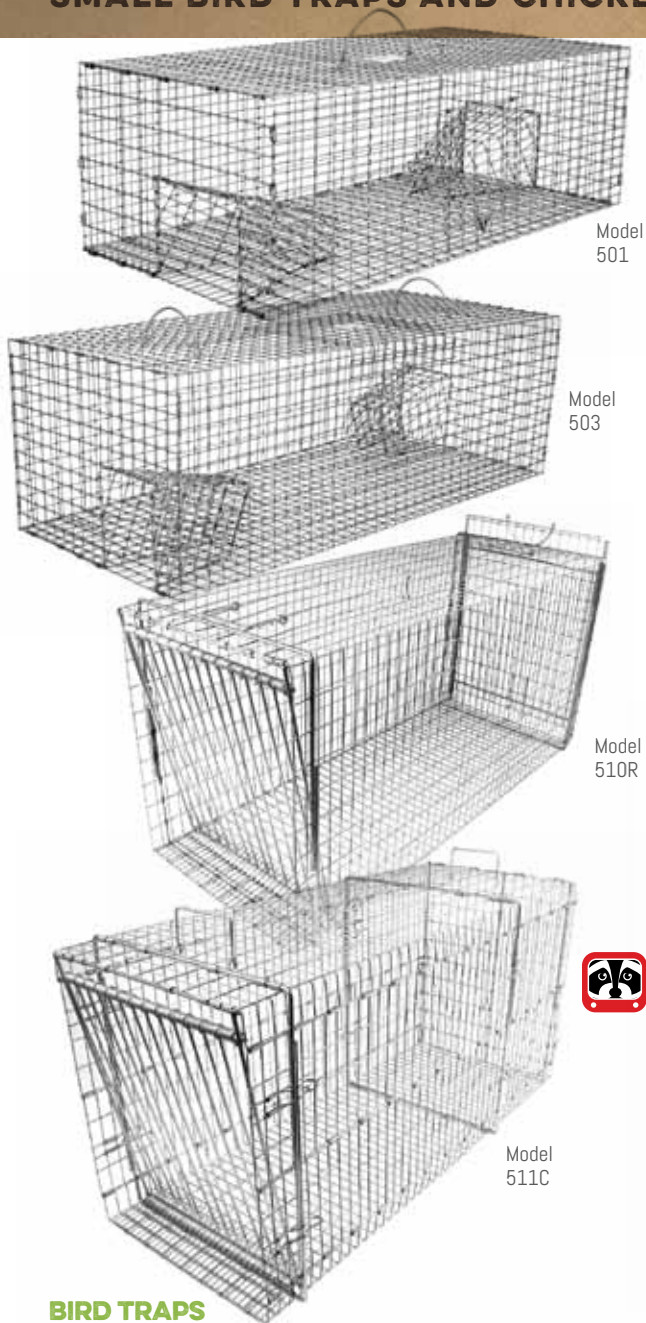

BIRD TRAPS

Our bird traps come assembled with small wire mesh openings, and two repeating trap doors. Birds enter the trap through funnel doors on each end of the trap. The unique design of the funnel doors encourages birds to move forward, into the traps, as they eat the bait.

MODEL 501, SPARROW TRAP comes assembled with a convenient release door which provides easy access to trapped birds. Model 501 is constructed with small wire mesh openings, ½" x 1" inch, and two repeating trap doors. Tomahawk's Sparrow Trap can hold up to 20+ sparrow sized birds at one time.

MODEL 503, STARLING TRAP comes assembled with a convenient release door which provides easy access to trapped birds. This trap has 1" x 1" wire mesh openings and can hold 15+ starling sized birds at one time.

MODEL TT-SP15, INDOOR BIRD TRAP is designed specifically to catch birds inside a home or commercial building. When set, the "Trap Door" is simply a welcoming platform with food. Birds stand on the platform eating happily until they press down on the perch. Suddenly, the floor gives way under them and they fall inside the ventilated box with a lid positioned securely above. When a bird is captured it will remain quiet and calm within the holding box until it can be released safely outdoors. Food and water can be left inside to protect the bird. To release the bird outside simply open the "Trap Door" lid and it will fly out.

***TLT TIP**

TRAPPING

For best results, lead animals into the trap by placing bait near entry doors and inside. Peanut butter is great bait for most rodents. Place a small amount just outside the doors, on the doors, and a liberal amount inside the trap near the middle.

These traps can also be used as positive set 'flush mount' traps by placing them directly against an animal's den opening.

MULTIPLE CATCH TRAPS - CAN HOLD 4+ RODENTS AT ONCE

These traps feature heavy duty galvanized wire mesh frames and spring loaded trap doors at both ends. The doors are designed to allow animals to easily enter the trap and to prevent escape.

MODEL	DESCRIPTION	L - W - H	CONSTRUCTION	WT	PRICE	6+
M35	Double Door Small Rodent Trap	24 x 3½ x 3½	½ x 1 - 16 gauge	2 lbs	\$26.82	\$24.14

KOONCE DOOR SET RACCOON TRAP

Model DS100 is a heavy duty trap for raccoons and similar size animals. This unique trap sets by simply lifting the door into the upright position. The recessed door enables you to set the trap flush against trees, buildings and walls. It Features a 1/4" steel rod frame wrapped with 14 gauge wire mesh. It also has an easy release rear door and is stained brown for camouflage.

MODEL	L-H-W	DESCRIPTION	CONSTRUCTION	WT	PRICE	6+
DS100	36 x 12 x 12	Koonce Door Set Raccoon Trap	1 x 1 - 14 gauge	18 lbs	\$77.50	\$69.75

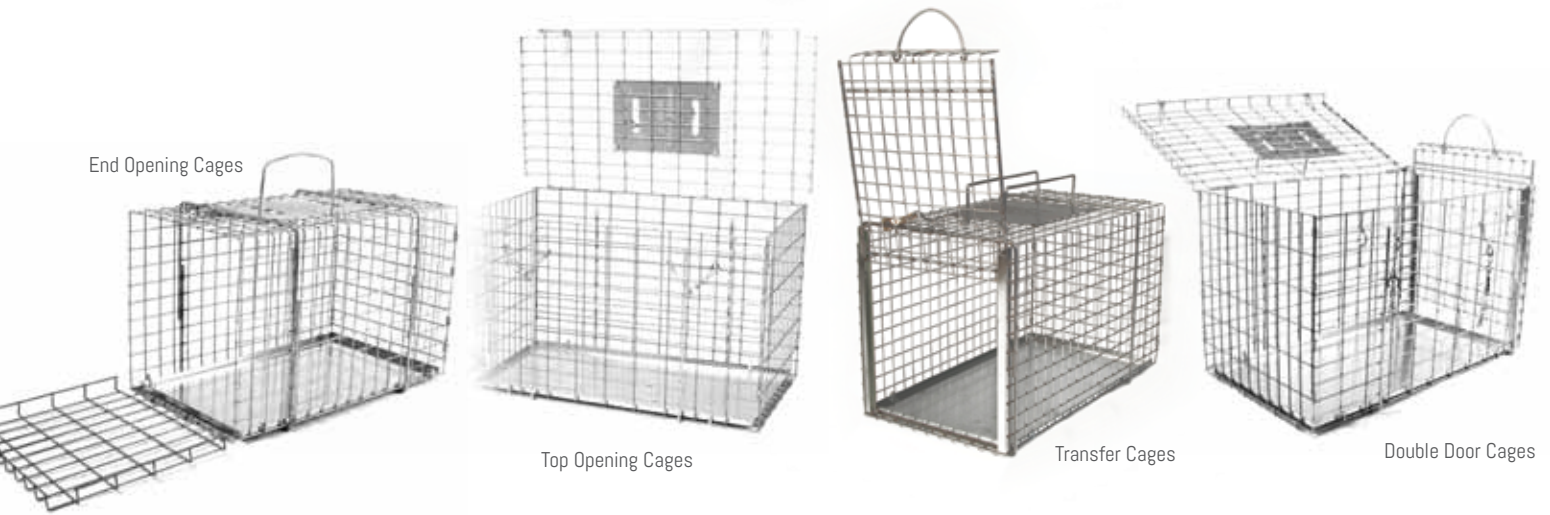

GROUND HUGGER MULTIPLE CATCH TRAPS

Positive set for chipmunks, gophers, and ground squirrels. Place directly over the animal's burrow, press the protruding U-Bars firmly into the ground to secure the Ground Hugger in place and let the animals trap themselves as they exit their dens. These traps also feature an easy release rear door.

TRANSFER CAGES

One entire end of these cages is a sliding door designed especially for easy transfer of animals from a "Easy Release" trap. Our transfer cages are built to specific sizes that match traps with easy release doors. Simply line up the door end of the cage with the easy release door of your trap, and pull the release doors up and out of the way. After the animal is moved to the cage, replace the door and latch into place. Your trap can now be redeployed.

RESTRAINT MODULES AND SQUEEZE CAGES

RESTRAINT MODULES

Restraint Modules are specifically designed for easy handling of animals during injections, examinations, or anytime absolute control of the animal is a must. The sliding panel locks into any position the handler desires, and will comfortably hold the animal. The restraint module can be operated with one hand and only requires one individual to operate. Heavy reinforcing rods are welded to the wire frame for extra support, and easy release door allows for easy transferring of animals. Our restraint modules match up nicely to our traps and cages with easy release doors.

NEW PRODUCT

Animal Graspers are essential tools for humane handling of cats, similar sized and smaller animals. The smoothly contoured grasper jaws are designed to restrain animals while minimizing discomfort. The jaws are also designed to prevent pinching or gathering of the animals skin. The handle grip commands a steel cable, which activates the jaws. This provides the handler with a precise feel of pressure being applied to the animal.

Tomahawk offers graspers in three different categories and two standard lengths. We also custom build graspers to any desired length. Please call for quotes on custom lengths.

STANDARD GRASPERS FEATURE:

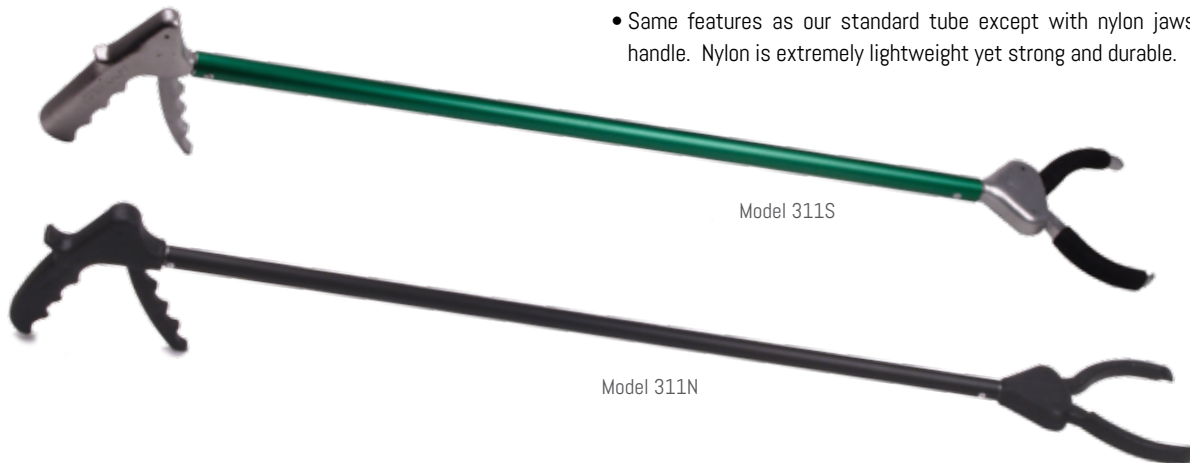

- Heavy-duty cast aluminum grasping end with two gripping jaws.
- Heavy-duty cast aluminum handle and lever.
- Stainless steel aircraft cable to connect lever to grasper end.
- Anodized aluminum tube.
- Cushioned grasper jaws for less stress to the animal

HEAVY DUTY GRASPERS FEATURE:

- Same features as our standard tube except with super strong .090 aluminum tube.

NYLON GRASPERS FEATURE:

- Same features as our standard tube except with nylon jaws and handle. Nylon is extremely lightweight yet strong and durable.

ANIMAL CONTROL POLES

Tomahawk Animal Control Poles provide handlers with great versatility to restrain or rescue a wide variety of animals. All of our control poles feature non-slip grips, automatic locking mechanism, spring loaded noose, protective bite guard, quick noose release knob, vinyl coated noose, and a 360 degree kink resistant swivel head. Extension poles have the added benefit of expanding when additional length is needed and retracting for storage and heavy duty use.

REPLACEMENT PARTS AVAILABLE FOR ALL ANIMAL CONTROL POLES.

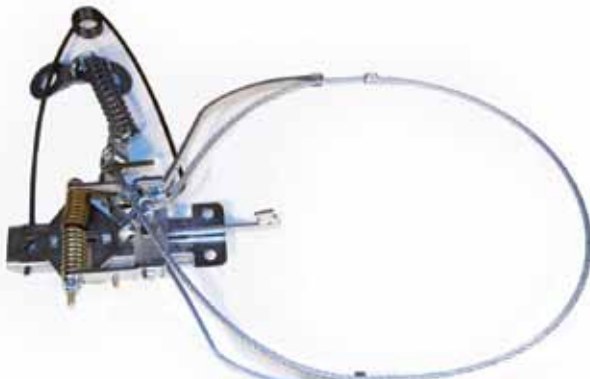

BAT CONES are designed to exclude bats and flying squirrels from homes. Seal all other entry points before installing Bat Cones. Bats are able to exit through the funnel but are unable to gain re-entry. After all animals have exited the home remove the cone and seal the exit point.

BAT HOUSES are ideal for keeping bats in the area and providing them with a home of their own. Bats are amazing animals that help keep mosquito and other insect populations in check.

COLLARUM® HUMANE SNARES

The Collarum® is one of the best and most humane canine capture devices on the market. The Collarum® throws a secure, non-choking cable loop over a canine's head and around the neck making capture faster, easier and more effective than ever before. Triggering requires a "bite & pull" action, which makes the Collarum® canine specific. It won't be set off by other wildlife.

Snake Guard Humane Glue Board Trap

The Snake Guard Humane Glue Board Trap is safe, effective, and easy to use. Snakes can be caught and relocated without harming them or you, and the No-Touch Removal System eliminates the need to handle snakes. The Snake Guard Snake Trap is made in the USA from completely biodegradable materials and is safe for the environment. When a snake enters it becomes entangled in the glue inside. It can be released at a new location by pouring vegetable oil across the snake and glue. The Snake Guard Snake Trap makes capturing snakes at home simple and cost-effective.

Snake Lure

Strike-Um Snake Lure is designed to attract snakes to snake traps. Squeeze a few drops onto a cotton ball and place inside the trap. When your target snakes are ready to feed they will follow the scent into the trap.

MODEL	DESCRIPTION	SIZE	WT	PRICE	6+
WCSTJSL	Strike-Um Liquid Snake Lure	4 Oz. Bottle	4 oz.	\$18.95	\$17.06

Sometimes, netting an animal may be the only solution to capture it. We offer several sizes of nets that work successfully on a wide range of animals.

MODEL 3350 - MIGHTY NET is great for animals up to 50 lbs. It works well on cats, large birds, waterfowl, wildlife, and small to medium sized dogs. The hoop opening is 34" x 40" and the tangle free net is 48" deep with 1 3/4" mesh openings. The handle telescopes from 65" to 96".

MODEL 3350R is the replacement net for Mighty Net (Model 3350).

MODEL 3543 - EXTENSION NET is perfect for a wide variety of smaller animals, from bats and chipmunks, to cats and small dogs. Its D-shaped hoop has an opening of 19" x 17". Its telescoping handle reaches from 6 to 18 feet. Its soft honeycombed black tangle-free mesh provides the best design for restraining animals, and it measures 20" deep with 1/4" mesh openings.

MODEL 3543R is the replacement net for the Extension Net (Model 3543).

MODEL 3421 - MINI NET is intended for animals up to 25 lbs. It has a hoop opening of 21" x 25". Its telescoping handle reaches from 2' to 4'. Its tangle free, nylon net is 36" deep with 1" mesh openings.

POLE DRAW NETS - These nets completely collapse within the handle for easy storage. The net opens by pushing up on the handle slide and locks into place while in use. Intended for animals up to 25 lbs. such as cats, small dogs and birds.

Throw nets are great to use when getting close to the animal is almost impossible, and conventional nets are out of the question. We offer high quality nylon throw nets with weighted perimeters. This makes them easy to throw and with great accuracy, just throw it like a Frisbee over the top of the animal. We offer several sizes.

TN4 - 4' THROW NET, is great for cats, small dogs, and similar sized animals. It is 4 feet in diameter with 1" nylon mesh openings.

TN6 - 6' THROW NET, is great for small to medium sized dogs and similar sized animals. It is 6 feet in diameter with 2" nylon mesh openings.

TN8 - 8' THROW NET, is great for medium to large size dogs and similar sized animals. It is 8 feet in diameter with 4" nylon mesh openings.

TN8	8' Throw Net	8' Diameter with 4" Nylon Mesh Openings	4.3 lbs	\$118.79

Ensuring safety for animal handlers, saving incredible amounts of time, and providing dozens of uses, the EZ Nabber is a very smart and sound investment. In addition to providing a safe and humane way to capture animals, aseptic intramuscular injections of tranquilizers, anesthetics and vaccines can be given through the net. Pets can be transferred from one cage to another without injury or stress to the animal or the practice staff. Pets can be removed from and/or placed in pet carriers. When the net becomes soiled, leave it on the frame and wash it in the tub with soap and water: use a disinfectant if needed. Abscesses and wounds can be flushed, and the pet can be bathed in the net. Our new 14" frame fits 18" x 18" cages.

Dura-Flex Animal Nets are designed specifically to capture animals. They have the following features:

SOLID NYLON HOOPS. Provides strength and flexibility. These nets can be pressed firmly against the ground or wall to entrap animals even when the net shaft is at an angle. This allows handlers to stand upright while netting and restraining animals.

LONG NEOPRENE GRIPS. Allows handlers to securely grab net shafts without slips, even when wet.

HEAVY ALUMINUM HANDLES. The 1" aluminum tube handle provides added strength and durability.

WOVEN 1/4" NYLON MESH NETTING. Does not propagate tears, unravel, or weaken from adjacent tears. Net seams are surged with polyester thread, and small mesh size prevents animal entanglements.

1/8" WOVEN NYLON HEM. Most wear and tear suffered by animal nets is to the hem that attaches the net to the hoop. This design will easily handle abrasive surfaces like concrete.

TIE-OFF CORDS. Allows handlers to secure animals in the bottom of the net.

STANDARD DURA-FLEX ANIMAL NET

Standard Dura-Flex Animal Nets feature a 72" hoop circumference and 1/2" nylon hoop. This net works well for cats, small dogs, and similar sized animals.

MODEL	DESCRIPTION	CONSTRUCTION	WT	PRICE	6+

ANIMAL GLOVES

BGD - BITE GUARD DELUXE

Designed to allow for very good dexterity and feel with good crushing protection. Made with 18" top-grain cowhide with Kevlar lining. There is additional padding in the sleeves which makes these gloves excellent for aggressive animals.

BGS (SHORT) - BITE GUARD 14" & BGL (LONG) - BITE GUARD 18"

These gloves provide excellent protection against animal bites and scratches. Made with split-grain cowhide with a Kevlar lining, these gloves offer very good crush resistance against bites.

BGP - BITE GUARD PREMIUM

These premium quality animal handling gloves are made in the USA and feature a thick Kevlar Felt lining for puncture resistance up past the elbow. Trusted by professionals working with wildlife and domestic animals, these gloves are an ideal choice for working with cats, dogs, birds, snakes and wildlife.

TM - MAXIMA GLOVES

Maximum crushing protection. Removable top-grain padded outer layer. Inner layer features elk hide hand for dexterity plus heavily-padded sleeves. Ideal for large, dangerous dogs or other crushing-bite animals as well as raptors and large wildlife.

BEAST18, BEAST22 - BITE BUSTER BEAST GLOVES

All in one utility glove with a double layer of Kevlar and synthetic puncture resistant polymers. Designed for handling animals with great dexterity, puncture resistance, and crushing protection. Contains no animal skins.

CG - CRITTER GLOVES

Critter gloves have been designed to give you added protection without compromising dexterity when handling animals. These gloves are made from Elk-hide and lined with Kevlar. The gauntlet is made from Cordura and lined with a special knit Kevlar. Resists sharp teeth, talons, and scratches. Covers past the elbow. Excellent for cats, birds and small mammals.

AGK – ANIMAL GAUNTLET GLOVES

These gloves offer great penetration resistance with good dexterity. Kevlar-lined elk hide hand. Long or extra-long Kevlar-lined elk hide sleeve. A perfect cat and bird glove and excellent for small mammals. 18" Gauntlet covers forearm. 23" Gauntlet covers above elbow.

TG – TALON GLOVES

Split cowhide glove with Kevlar lining and sleeves to the elbow. Can be used with cats, dogs, raptors, and other wildlife.

AR – RESISTOR GLOVES

Excellent crushing protection. A nearly ideal combination of dexterity, penetration resistance, and crushing protection. A Spectra-lined hand with a shield for protection against crushing bites. The gauntlet is extremely well-padded and features hidden trauma plates to spread the strongest bite forces over a wide area. Ideal for working with cats, dogs, and all wildlife.

RG – RABIES GLOVES

These gloves feature an elk hide hand, lined with Kevlar, and a double layer of leather extending over the back of the hand for bite protection. Heavily padded gauntlets extend to elbow for full forearm protection. Offers high manipulability with full protection throughout.

VP03 – VET-PRO MAGNUM GLOVES

Provide superior puncture resistance and crushing protection with 400 stainless steel safety bars built into the hand, clinched on the back and front of the fingers, to disperse force and shield against penetration. Initially developed for handling primates, these gloves offer the greatest bite protection while still maintaining an ample amount of dexterity.

VP04 – VET-PRO WARDEN GLOVES

Features a ballistic lining of DuPont Kevlar felt. Unlike knitted or woven versions, Kevlar felt is tightly packed for maximum puncture resistance. Double stitched with Kevlar thread, with a loose fit for dexterity and emergency removal. Developed for the safe and gentle handling of dogs, cats, snakes, and small wild animals. 23" inches overall hand and cuff.

VP05 – VET-PRO WARDEN PRO-MAX GLOVES

Developed for use with feral cats, snakes, dogs, reptiles, and other animals. Double lined thick Kevlar felt in the hand and cuff portion.

Powerful enough for an outbreak and safe enough for everyday use! Accel has more than 6 times the cleaning power of any other disinfectant and works in half the time of traditional disinfectants. Accel kills bacteria in just 5 minutes vs 10 for traditional disinfectants. Traditional disinfectants usually need to be applied twice in order to keep the surface wet for that long. Traditional disinfectants also require that you wash and rinse the surface prior to using them, and then rinse again after the 10 minute contact time is met! WHO HAS THE TIME! With Accel you can disinfect in one single step. Accel is safe, fast and will not destroy your equipment like other cleaners. It is an ideal product for cleaning traps, cages or any surface that has been touched by animals. It is available in concentrate, and ready to use wipes.

COULDN'T FIND IT? WE CAN HELP!

CUSTOM TRAPS AND CAGES

If we don't already make what you are looking for we can make custom traps to fit your needs. We work with government organizations, professionals, wildlife control operators, and rescue groups around the world to develop traps and cages that meet their specific needs. We can customize existing products or start from scratch to make the trap, cage or accessory that will work for your situation. Call us at 800-272-8727 or email trapem@livetrap.com and ask to speak to a custom trap specialist.

REPLACEMENT PARTS

Should you ever need to replace or add parts to a trap we sell all of the parts we use to make our traps. Everything from trap doors, release doors, trip pans, springs and clips. Every part on your trap can be purchased and replaced. We even offer tools for clips and cutting. Our parts are available on our website categorized by trap model or call us and we can find the part you need.

ROLL WIRE

We sell 100' rolls of galvanized wire mesh ranging from 9" tall up to 72" tall. They are available in many different mesh patterns and thicknesses. Please call us at 800-272-8727 or email us at trapem@livetrap.com for prices and availability of sizes and styles.
